

## Summary

GOBI Technologies delivers the Gen AI Implementation Accelerator (POC) to help organizations rapidly move from prioritized Gen AI ideas to working solutions using Azure OpenAI. The engagement focuses on validating feasibility, demonstrating business value, and accelerating time-to-value in weeks rather than months.

Using a structured Discover & Assess, Ideate & Prioritize, and Strategize & Plan approach, we design and build a functional Gen AI POC, test it with real users, and validate results against defined success criteria. Capabilities such as prompt engineering, Retrieval Augmented Generation (RAG), and responsible AI controls are incorporated to ensure secure and reliable outcomes.

The engagement concludes with a production-ready scaling blueprint, providing a clear path for secure, governed, and cost-controlled Gen AI deployment at enterprise scale.

## Deliverables

- **Gen AI Use Case Definition & Success Criteria:** Refined and validated high-priority Gen AI use case with clearly defined business objectives, success metrics, and acceptance criteria.
- **Gen AI POC Architecture & Design:** Designed solution architecture leveraging Azure OpenAI, including integration points, data sources, APIs, and security considerations.
- **Functional Gen AI POC Solution:** Developed a working Gen AI proof of concept incorporating prompt engineering, orchestration logic, and Retrieval Augmented Generation (RAG) where applicable.
- **Pilot Validation & Performance Findings:** Deployed POC to a pilot user group, capturing performance metrics, user feedback, and validation results against defined success criteria.
- **Production Scaling Blueprint & Recommendations:** Delivered a production-ready blueprint including target architecture, governance model, cost controls, monitoring approach, and next steps for enterprise deployment.

### Assessment Focus:

- Gen AI Use Case Feasibility & Value
- Data, Integration & Model Readiness
- Security, Governance & Responsible AI Controls

### Benefits

**Rapid Time-to-Value:** Accelerate Gen AI adoption by moving from idea to a working POC in weeks using Azure OpenAI.

**Validated Business Impact:** Confirm real business value through hands-on testing, user validation, and measurable success criteria.

**Reduced Gen AI Investment Risk:** De-risk AI initiatives by validating feasibility, data readiness, and technical complexity before scaling.

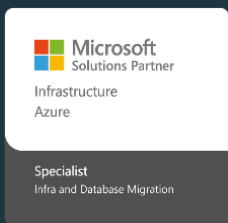

**Working Gen AI Solution:** Deliver a functional Gen AI POC incorporating prompt engineering, orchestration, and Retrieval Augmented Generation (RAG) where applicable.

**Secure & Responsible AI Foundation:** Implement security, governance, and responsible AI controls to support safe and compliant Gen AI usage.

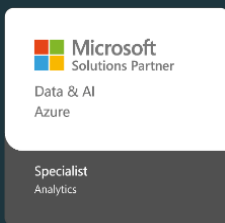

**Clear Path to Production Scale:** Exit with a production-ready blueprint covering architecture, cost controls, monitoring, and governance for enterprise deployment.

## Why partner with GOBI for your Microsoft cloud needs

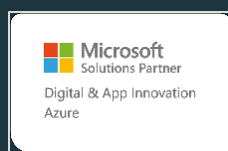

GOBI Technologies is a trusted Microsoft Cloud Partner helping organizations turn technology into measurable business results.

Microsoft Solutions Partner  
Infrastructure Azure  
Specialist  
Infra and Database Migration

Microsoft Solutions Partner  
Data & AI Azure  
Specialist  
Analytics

Microsoft Solutions Partner  
Digital & App Innovation Azure

**Proven Track Record** - Successfully guided 200+ organizations through cloud transformation with documented ROI exceeding 304% within 3 years.

**Risk Mitigation Excellence** - Comprehensive risk assessment and mitigation strategies that protect your business during transformation while accelerating value realization.

**End-to-End Partnership** - From initial strategy through full implementation and ongoing optimization, we remain your trusted advisor throughout the entire journey.

**Microsoft Direct Access** - Our Solutions Partner status provides direct channels to exclusive resources to help accelerate your cloud adoption.
