

Azure SAAS, PAAS, IAAS solutions design, license & deploy. Azure MFA on-prem/cloud, Azure Password Write Back + SSPR. Whatever solutions you need, we can help!

## MICROSOFT AZURE SOLUTION : Golden Five Consulting

Golden Five was created to provide exceptional service to clients in a cost affective manner. Our highly skilled team of Certified Technical Experts, Microsoft MVPs, Professionals, Experienced and Knowledgeable Staff, and dedicated Architects willing and ready to help you, our partner with your Microsoft needs.

### WHAT WE OFFER

Azure Multi-Factor Authentication (AMFA) on-premises is a great solution for companies which have a requirement to access an application from internet. We have implemented multi-forest AMFA on-prem solution to access on-prem applications like RDP to VDIs. This solution increased the security. We used AMFA, ADFS, ADFS Proxy for the solution.

Azure Password Write Back with self service password reset is an ultimate innovation of Microsoft. This solution allows user to reset the password by their own. We have successfully implemented this solution and helpdesk calls has reduced in a huge number which made our customers delighted.

Azure is not limited to one service. Office 365 is a Software as a service (SAAS) and everyone likes it. We are the experts in SAAS implementation. When you are moving apps to SAAS then you might also like to move infrastructure to Azure which is infrastructure as a service (IAAS) and our virtualization teams designs IAAS at its best every single time.

We are a Tier 1 Cloud Solutions Provider which means we sell Azure, Office 365 and Dynamics 365. Our experienced experts also enables us to implementation of all Microsoft technology. Be it IAAS, PAAS or SAAS. Azure IOT is an example which is driven by Platform as a service (PAAS). Our team helps customers to adopt it, in an efficient manner.

### WHAT OUR CUSTOMERS ARE SAYING

"Golden Five ROCKS. Their experience and knowledge were impressive and it saved us a lot of time. They were very methodical, they have their own exhaustive check-list of everything you need to know about before making a change. They saved our butts! They are very professional and very personable, we truly trust them unequivocally. We strongly recommend Golden Five Consulting.

# Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

## KEY USE CASES

### WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

### MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

### MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

### FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

### ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

### DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

### GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
