Microsoft Dynamics 365

Microsoft Business Central Services

We guarantee success in the digitization of processes with the Microsoft CLOUD Platform

About us

Goom is a Microsoft Gold partner that was born in 2013 with a **senior team** experienced in technology consulting and the implementation of Microsoft solutions.

We were pioneers in the **deployment of solutions in the cloud**, a bet that over time has become Microsoft's main strategy.

In addition to the consulting and implementation service, our team develops customizations and vertical solutions oriented to specific sectors, which cover specific requirements of each organization.

Specialization in **education organizations.**

Microsoft

We are one of the few Partners that offer the **Microsoft Global Platform**

We propose the most appropriate services and licenses for each need, avoiding unnecessary expenses and efforts

We always propose the use of the standard Microsoft system, and if it does not meet the needs, we adapt it as little as necessary to suit the client

Digital transformation goes beyond the implementation of a solution

Quality

RGDP

We prioritize the protection of personal data. In this line, one of the main points is the power to control the use of the user's personal data, guaranteeing fundamental rights and public freedoms. For this reason, we have mechanisms, procedures and ways of action for the processing of personal data of all interested parties (clients, workers and other entities).

Quality and safety policies

Our goal is to be leaders in terms of quality, in the solutions we implement and in the service we provide. For this we count on the motivation and participation of all the people in the team and we promote a continuous improvement of the management system based on the ISO 9001 standard.

In addition, we are aware of the commitment to information security and, therefore, we have an Information Management System certified according to the ISO 27001 norm and standard.

Social and corporate responsibility
