

BizMyte

AI-Powered Client Intelligence & Compliance Workspace for Advisers

Overview

BizMyte is a cloud-based, AI-powered SaaS platform purpose-built for advisory professionals managing complex client relationships and high-stakes decision environments. Built on Microsoft Azure, BizMyte unifies client intelligence, meeting workflows, compliance-ready processes, and decision support into a single, integrated workspace.

In today's advisory environment, professionals rely on multiple disconnected systems, resulting in inefficiencies, missed insights, and operational risks. BizMyte addresses this challenge by creating a seamless environment where data, insights, actions, and compliance requirements are interconnected and continuously updated.

By embedding AI directly into everyday workflows, BizMyte enables advisers to move from reactive administration to proactive, insight-driven decision-making.

Key Capabilities

AI-Powered Client Intelligence

- Transform structured and unstructured client data into real-time, actionable insights
- Deliver context-aware recommendations based on historical interactions and current activity
- Provide a unified, continuously evolving client profile across meetings, communications, and records
- Enable faster and more informed decision-making during client engagements

Meeting Intelligence & Automation

- Automatically capture and transcribe meetings using AI
- Generate structured summaries, insights, and key discussion points
- Extract action items and assign follow-ups without manual intervention
- Link meeting outputs directly to client profiles for future reference and continuity

Workflow & Task Automation

- Create structured, repeatable advisory workflows aligned with business processes
- Automate follow-ups, reminders, and task assignments
- Prioritize tasks based on urgency, context, and client needs

- Reduce administrative overhead while improving execution consistency

Compliance-Ready Operations

- Standardize workflows to align with regulatory and compliance requirements
- Automatically generate documentation and maintain audit trails
- Ensure consistency in advisory processes across teams and engagements
- Reduce compliance risks through system-driven governance

Integrated Advisory Tools

- Provide built-in financial calculators and scenario modeling tools
- Support advisers during client conversations with real-time analysis
- Enable better planning and recommendation capabilities
- Integrate decision support directly into workflow execution

Business Benefits

For Professionals

- Significantly reduce time spent on administrative and manual tasks
- Improve the quality and consistency of client interactions
- Access relevant insights instantly without switching between systems
- Focus more on high-value advisory and relationship building

For Organizations

- Improve overall operational efficiency and productivity
- Strengthen compliance and audit readiness across teams
- Standardize advisory workflows and best practices
- Enhance client satisfaction and long-term retention

Why BizMyte

Unlike traditional CRM systems or fragmented point solutions, BizMyte acts as an intelligence layer across advisory workflows. It integrates decision support, workflow execution, and compliance into a unified system, enabling organizations to move beyond data management toward intelligent operations.

BizMyte is designed not just to store information, but to activate it—turning data into insights, insights into actions, and actions into measurable outcomes.

Built on Microsoft Azure

BizMyte leverages Azure-native services to deliver enterprise-grade scalability, reliability, and security:

- Azure OpenAI Service for advanced AI capabilities and natural language intelligence
- Azure AI Search for semantic retrieval and context-aware insights
- Azure SQL and Cosmos DB for structured and unstructured data management
- Azure Key Vault and Managed Identity for secure credential and access management
- Scalable cloud infrastructure supporting high availability and performance

Deployment Options

BizMyte follows a hybrid deployment approach to support both scalability and enterprise needs:

- Multi-tenant SaaS model for rapid onboarding, cost efficiency, and scalability
- Enterprise deployment options including dedicated environments for enhanced control, security, and customization

This flexible deployment model allows organizations to adopt BizMyte at their own pace while ensuring long-term scalability.

Pricing

- SaaS Plan: AUD 150 per month, designed for individual professionals and small teams
- Enterprise Plan: Custom pricing based on organization size, deployment model, and integration requirements

Key Value Propositions

- AI-powered client intelligence enabling faster and more accurate decision-making
- Automated meeting capture, summarization, and follow-up generation
- Compliance-ready workflows designed for regulated environments
- Unified workspace replacing multiple disconnected systems
- Built on Microsoft Azure for enterprise-grade performance, security, and scalability

Target Customers

- Financial advisers and planners
- Mortgage brokers and lending professionals

- Wealth management firms and advisory practices
- Advisory teams within financial institutions and enterprises

Use Cases

- Preparing for and following up on client meetings with AI-generated insights
- Supporting advisory decision-making with real-time intelligence
- Managing workflows, tasks, and client interactions in a structured manner
- Ensuring compliance through automated documentation and audit tracking
- Enhancing client relationship management with intelligent, data-driven insights
