

About us +++

We are ilegra

We are more than a **global strategy, innovation and technology company**. We combine the power of technology with people's passion. And this combination takes us further.

Our portfolio is centered around solutions in strategy and **business, innovation, data, and cloud.**

20+

years of history

30+

locations worldwide have people from ilegra working on projects

5 million+

hours dedicated to delivering strategy, innovation and technology projects

574+

clients have already trusted ilegra

About us +++

Proven expertise in

innovation & digital transformation

Market leaders in:

- Digital Transformation Services (2023)
- Business Consulting Services (2022)
- Customer Experience Services (2022)
- **Future of Work – Workplace Strategy Transformation Services (2021)**

**ISG (Information Services Group) is a leading global company in technology consulting and research*

Main Clients

25 Active GitHub Clients

We combine innovation and technology for market leaders in Brazil and around the world.

Team and Certifications

Technical team with approximately 200 people with the following profiles:

- Software Architects
- Software Engineers
- Cloud Engineers
- Data Architects
- Data Engineers
- Database Engineers

Technical certifications:

- GitHub Actions
- GitHub Administration
- GitHub Foundations
- Azure Solutions Architect Expert
- Azure DevOps Engineer Expert
- Azure Administrator Associate
- Azure Developer Associate

Challenges

How We Solve It (Unique Value Proposition)

Overloaded Operations or Architecture Teams for Releasing Features That Accelerate Product Teams

We treat **the platform as a product** and engineering teams as customers. Features that generate the most business value are prioritized within the delivery roadmap.

Difficulty innovating due to technology. Adding new tools always involves overhead for operations teams.

New functionalities and designed **features are released following a self-service model**. We provide fully automated features, intuitive user interfaces, and well-documented resources, allowing **engineering teams to use new tools without relying on the operations team**.

Feature release cycle with many stages.

We incorporate modern practices in the deployment pipeline, such as stress testing, load testing, and chaos engineering. **We ensure compliance through automation, replacing manual processes**.

Difficulty for teams in establishing and maintaining engineering standards across various product teams.

Empowering engineering teams with modern software engineering practices through peer reviews, design sessions, and training.

Infrastructure incidents have a direct impact on the end-user experience. Resolving production incidents consumes excessive time and energy.

Observability to enable more efficient troubleshooting. Introduction of software engineering techniques in infrastructure solution design. **Remediation strategies that take actions without the need for human intervention**.

GitHub / Platform Engineering Cases

Immersive Training

Bootcamp GitHub Copilot

"Copilot Bootcamp" is a program that improves programming skills by covering basic AI, practical use of GitHub Copilot, code autocompletion, unit test generation, documentation, debugging, refactoring, and prompt engineering.

Duration: 8 hours.

Target audience: developers using the GitHub platform

Prerequisite: For this bootcamp, the customer's infrastructure environment will be used.

What you will learn:

- Basics of Artificial Intelligence (AI)
- Ethical Considerations in Using AI
- Practical applications of GitHub Copilot:
 - Code autocompletion
 - Generating unit tests
 - Good documentation practices

Advanced programming techniques with Copilot:

- Debugging
- Refactoring
- Prompt engineering

Finishing with a practical laboratory!

Bootcamp GitHub Copilot

Why: Empower your developers to leverage GitHub Copilot's AI-driven suggestions for faster, smarter coding, reducing development time and errors.

Capabilities and Credentials: GitHub Actions Training, GitHub for Developers Training, GitHub Administration Training, GitHub Advanced Security Training, GitHub Migrations and GitHub Enterprise Importer

Unique Value Proposition: Official GitHub partner since 2019, more than 40 customers served and 6,000 active licenses. Copyright adoption programs. Direct channel with the Global GitHub team and Microsoft.

GH FY Motion (Land, Secure, Accelerate): Accelerate

Win(s): Developers can write code significantly faster by leveraging Copilot's AI suggestions and autocompletions, reducing the time spent on repetitive coding tasks.
