

# Engagement Overview

Design as a four-week engagement, the Cybersecurity Assessment Engagement offers valuable insights into common cybersecurity threats and their impact on your business operations. Through specialized trials and subscriptions, you'll gain visibility into threats and vulnerabilities within your environment. This engagement can help define clear next steps to mitigate risks effectively.

## Kick-off Meeting

Introduce the Cybersecurity assessment, discuss the engagement activities, align expectations and establish timelines.

## Define Scope

Define and finalize the engagement scope and required configuration settings for the engagement tools.

## Change Management

Customer to go through their change management process and obtain approval for configuration changes as per defined scope.

## Environment Configuration

Configure Microsoft Defender and Purview for assessment activities.

## Review & Analysis

Analyze identified vulnerabilities and configuration weaknesses within the Cloud environment.

Analyze data handling risks identified within Microsoft Purview.
