

Business Central & Bullhorn One Integration

Ask yourself . . .

Do you manually transfer data from Bullhorn One to Business Central?

Is your data siloed across software?

Are you looking for enhanced profitability by reducing manual efforts to move data?

Do you want to avoid custom development with your Bullhorn One integrations?

Is your AR/Collections automated?

While the business needs of each organization remains unique, a common challenge faced by staffing firms today is finding a solution to fully solve their back-office / ERP integration challenges.

Silos of unconnected data often lead to miscommunication, misinformed decision making, and decreased productivity within an organization.

Making the Connection

Connect the dots between your Microsoft Dynamics 365 Business Central and Bullhorn One without manual intervention for enhanced profitability reporting, better data management, and increased operational visibility and control.

Bullhorn One Connector for D365 Business Central

GraVoc's experienced team of ERP specialists solve common challenges among staffing firms. We've built a two-way connection that synchronizes and moves data between the Bullhorn ATS and Microsoft Dynamics 365 Business Central. The process seamlessly populates detailed Customer, Candidate, and General Ledger activity, making it easier to manage credit, collections, and receivables reporting.

Our Bullhorn One Connectors for Dynamics 365 Business Central were built from the ground-up to satisfy the most challenging elements of system integration.

Breaking data silos & reducing inconsistencies:

Customers, Candidates

Pulls new & modified Company & Candidate records from BH into BC & creates the Customer & Vendor Cards.

Cash Receipts

Pushes new Customer & Candidate payment data from BC to BH, giving front-office users ready-access to payment activity.

Invoices, Credits, Rebills

Pulls billable & payable charges from BH into BC & creates a Sales Invoice/Credit Memo/Payables Invoice.

Error Handling

Writes-back error messages to BH, giving users visibility within the ATS.

Let's discuss your ATS ERP Integration Needs ...

GraVoc's multidisciplinary teams of designers, developers, cybersecurity experts, and IT consultants enable strategy-driven digital transformation for businesses nationwide. Contact us today to learn how our Connectors can automatically move critical financial data between Bullhorn and your Dynamics 365 Business Central.
