

GreenPages' Cost Optimization Services

Investment in digitally transformative approaches has greatly accelerated over the past year, with the current pandemic and resulting economic turbulence underscoring just how critically important technology is to success and survival.

The challenge is that many companies are operating on legacy platforms and struggling to find the budget necessary to modernize.

Here are four key **Cost Optimization Service Areas** you can leverage immediately through **GreenPages** to help you drive your business in this unprecedented time.

Trapped Value Recovery & Redeployment

Imagine what you could achieve if you could reallocate 30-40% of your annualized budget to strategic transformation initiatives while also increasing productivity and improving performance. Services include Trapped Value Analysis, Planning, and Implementation.

Enterprise Expense Management

Save up to 40% off your entire organization's communications spend and gain visibility while reducing and automating bills into easily managed monthly workflows and reporting. Services include Managing Billing Discrepancies and Right-sizing Contracts.

Cloud Consumption Advisory Services

We help you compare a variety of cloud plan options with multiple providers to give you a full comparison of anticipated costs across leading consumption models. Services include Pricing Discounts, Funding Programs, and Managed Services estimates.

Cloud Cost Optimization Services

Put a stop to cloud cost overruns and optimize your spend so you're only paying for the cloud you need, when you need it. Services include Cloud Billing & Expense Management; Capacity Reservation Management; and Cloud Budgeting & Forecasting.
