# What is GAP?

→  
GAP is a *consulting* and *technology services* company.

We provide **custom software, data engineering and**

**modernization solutions.**

# What Does GAP Do?

At GAP, we consult, design, build and **modernize** software and data solutions. We focus on revenue-generating and mission critical applications core to our clients' business.

With modernization services and AI tools, we help businesses achieve a competitive advantage through technology.

## Migration & Modernization

SERVICES & PRODUCTS

# Legacy Application Modernization with GAP

## History

- 17 years in business (Mobilize since 1993 and Mission Data since 1996)
- Private
- Profitable
- **Woman-owned**
- Values-based
- Diverse by design
- Agile everywhere

## Migrate to Native Cloud, Modern Code

- Support for popular client server tools, including:
- **VB6 & VB.NET**
  - **C#**
  - Winforms
  - Web Forms
  - Silverlight
  - PowerBuilder
  - Clarion

## Billions of Lines of Code Migrated

- **AI based Automation**
- 30 years experience in application migration
- 200K+ active developers

## Excellent Customer Satisfaction

- Thousands of projects delivered **on time with fixed budget**

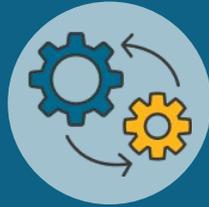

# Your Options for Modernizing

## Do Nothing

## Packaged Software

## AI Automation Tools

Automated code conversion to new platform

- Preserve and leverage existing business rules / IP
- Fast and efficient (on time, on budget, at quality...)
- Native, readable maintainable new code will allow you to implement DevOps best practices

## Manual Rewrite

Replicate existing functionality for modern platforms

- Rewrite costs for migration are more expensive
- Need to manage tightly
- <https://www.mobilize.net/solution/rewrite-calculator>

## Hybrid Approach

Combination of Automation and Manual Rewrite

- Best of both worlds, offering fast migration, quality custom finish
- Recommendation report available

# Legacy code is expensive to keep around

- Higher staffing costs for specialized talent.
- Higher maintenance costs for supported obsolete hardware.
- High maintenance fees for legacy vendors (i.e. high support contracts for Windows XP).
- Higher costs to add features or do required updates.
- Longer project cycles due to poor architecture, linear programming, bad data schemas, and more.
- Delays in responding to market changes and business cycles.

# Examples of GAP Migrations Customers by vertical

## Platform Partners

## Healthcare

## Financial Services

## Mfg/Svcs

## GSI's

## Gov't

# WHY GAP

GAP was founded on the promise of greatness, and delivering an exceptional client experience, every time.

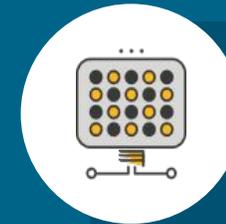

## Solution Architects

Domain experts who will know your code as well as you do

## Blueprint

A mapping of the past, to create a plan for the future

## AI Powered Migration

Billions of lines of code successfully migrated giving a jumpstart to production

## Fixed-Bid Pricing

Risk mitigation designed for a capital expense

## Modernization

**Toolbox**  
Experts in application and data engineering  
...go beyond migration

## Cloud Integration

Our migration engineers can take you directly to the cloud via Azure

**Thank you!**
