About Growth Acceleration Partners

At GAP, we consult, design, build, and modernize revenue-generating software and data engineering solutions for clients. With modernization services and AI solutions, we help businesses achieve a competitive advantage through technology.

Using proprietary tools and seasoned expertise, GAP's full spectrum approach ensures the innovation delivered aligns with your business goals. This commitment extends to an investment in our people's continuous learning and professional skills development — allowing for continuity and specialized technology processes, which enable clients to stay ahead of trends in a rapidly evolving digital landscape.

As a consulting and technology services company, GAP takes you from idea to business growth. Our comprehensive suite of in-demand technology services gives you access to highly-specialized software and data engineers ready to tackle your most critical challenges. So whether you're starting from a whiteboard, updating old technology or building the next game-changing AI application — we'll guide your next step and pave the path for your business' growth.

The GAP Difference

Breadth of Capabilities with End-to-End Services
- GAP partners with clients to turn ideas into value, with specialized technology for your continued success. We provide services in every stage of software and data engineering process, including technology consultation, strategy, architecture, automation, delivery, hosting and sustaining engineering.

Depth of Innovation and Modernization Expertise
- Go from slow and obsolete to unlocking the future of your applications and generating revenue with leading technology. GAP is the leader in application modernization and will upgrade your legacy systems by designing for the future.

Investment in People to Fuel Your Success
- GAP's focus on professional growth, rigorous recruitment, values and diversity spurs innovation, increases agility and creates an environment that keeps GAPsters with our company for years. Our clients benefit from our people's long tenure at GAP and ever-advancing expertise.

**Comprehensive AI-First Expertise to Drive Your Business Growth**
- From ensuring data readiness and effective MLOps — to building robust data pipelines, developing advanced algorithms and delivering the latest emerging technologies — GAP empowers businesses to unlock the full potential of AI.

Top-Tier Talent via U.S. and LatAm Engineering Teams
- GAP builds focused, accountable and engaged software engineering teams with experts who have specialized, in-demand skills and understand your goals.
