Magically create video documentation with AI

Guidde is the generative AI platform enabling teams to deliver know-how 11x faster for easy sharing with customers or employees. Market-leading companies use Guidde video documentation to answer customer questions, onboard and train employees, and drive self-service, enabling teams to perform better.

AI-Powered Knowledge Capture in Seconds

Guidde enables technicians and trainers to rapidly document and share step-by-step processes, reducing the time needed to create and distribute training content.

Guided Learning for Hands-On Training

Whether it's stripping down an engine with an iPad or walking through a complex repair, Guidde's interactive video guides deliver intuitive, on-the-job learning without the need for physical instructors.

Technician Training Without Digital Twins

Guidde provides a scalable alternative to digital twins by leveraging short-form video documentation, making technical training more accessible, cost-effective, and easy to update.

Real-Time Knowledge Sharing from the Field

Workers can instantly capture and upload instructional videos as they perform tasks, ensuring tribal knowledge is preserved and easily shared across teams.

Skill Assessment & Upskilling Roadmaps

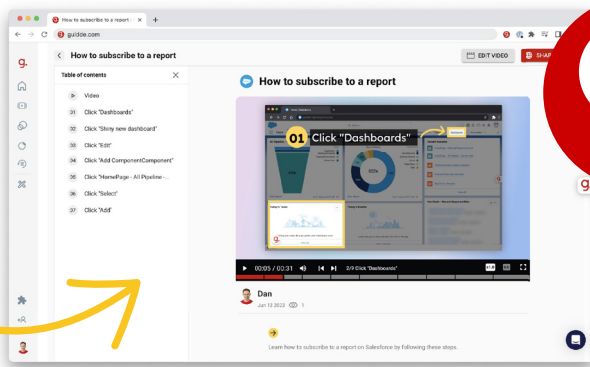

Guidde's analytics can help evaluate a technician's ability by tracking their interactions with training content, enabling managers to design personalized learning paths for skill development.

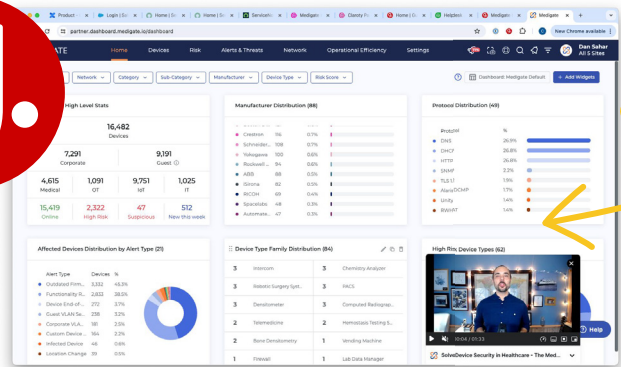

Seamless Integration Across Platforms

Integrate Guidde across your existing apps and workflows, ensuring knowledge is accessible where and when it's needed most.
