GUIDEPOINT® SECURITY

# Realize the Full Value of Your Microsoft Security Stack

Despite having comprehensive Microsoft security tool licenses, organizations with limited resources and bandwidth often leave features underutilized, reducing their return on investment and creating security gaps.

GuidePoint Security helps organizations maximize their Microsoft security investments. Our certified experts bridge resource gaps to help align security strategies with business goals and improve tool utilization. Our tailored solutions reduce risk, ensure compliance, and streamline complexity. Partnering with GuidePoint, your organization can build the foundation to scale confidently while effectively addressing mounting security and compliance challenges.
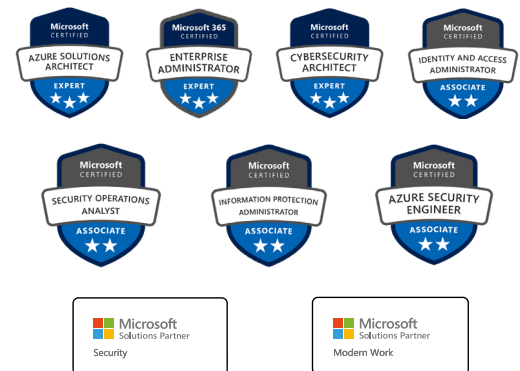

Protect, Optimize, and Innovate

Underutilized Microsoft security licenses represent a wealth of untapped value, especially in resource-constrained organizations. GuidePoint Security helps transform Microsoft's security capabilities into a strategic advantage. We help organizations of all sizes discover hidden issues, design resilient architectures, build secure environments, and continuously improve their security posture. Our certified experts help organizations:

- ⊘ **Discover** licensing inefficiencies, underutilized tools, security gaps, and compliance issues.
- ⊘ **Design** tailored security architectures that fully utilize your Microsoft tools.
- ⊘ **Build** secure, efficient Microsoft security solutions that scale with your organization.
- ⊘ **Improve** your security posture with intelligence-driven Microsoft configurations and build an adaptive, self-strengthening cyber defense.

Turn Microsoft Investments into Security Outcomes

Microsoft offers a wide range of security tools designed to share insights and eliminate silos, providing a unified security experience across identities, endpoints, data, and cloud environments. But many organizations aren't using the security features to their full potential. GuidePoint experts help organizations extract maximum value from their subscriptions. Together, we help organizations reduce risk, optimize costs, and build resilience that scales with each organization's growth and changing security needs.
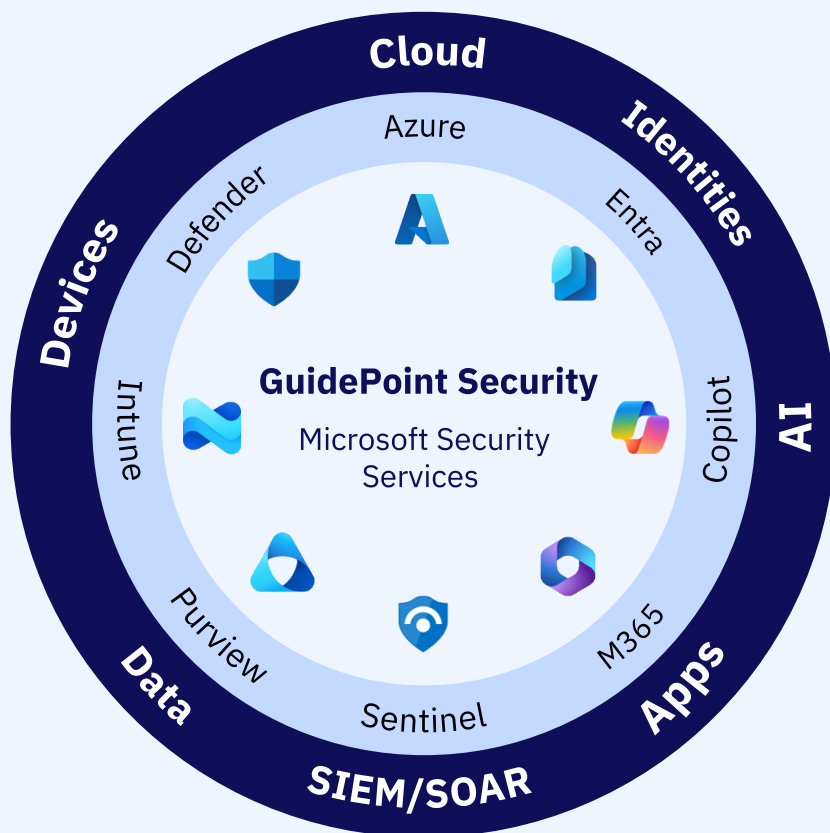

Expert-Led Assessment and Implementation

Our Microsoft-certified consultants bring deep, end-to-end expertise to every engagement. We provide guidance from initial assessment through deployment and ongoing optimization. Our threat-aligned approach configures Microsoft security tools against real-world threats. With our proven track record across complex deployments, we help organizations close security gaps and improve resilience as they build or mature their Microsoft security program.

Future-ready Security Architecture

We design Microsoft security architectures that grow with business. Our modular approach tailors services to each client's maturity level, whether just starting out or optimizing an advanced deployment. We implement scalable automation through Sentinel SIEM/SOAR playbooks and Intune autopilot, while building future-forward foundations incorporating zero trust, hybrid identity management, and AI-enhanced security controls that adapt to evolving threats and compliance requirements.

Why GuidePoint Security

When cyber threats target your Microsoft environment, you need specialized expertise. GuidePoint Security maximizes your Microsoft security investment through tailored solutions that unlock hidden capabilities in Defender, Azure, Sentinel, Entra, Intune, and Purview. We transform underutilized tools into a cohesive security ecosystem, optimizing costs while strengthening protection. Our Microsoft-certified experts implement intelligent configurations that evolve with emerging threats, enabling your business to scale confidently in the cloud while maintaining compliance and operational excellence.
