

## SPORT & EVENT | simply-X Connect Interface

SEAMLESS INTEGRATION OF simply-X INTO YOUR ERP SYSTEM

DYNAMICS BC – APP

We get our customers ready for their competition!

The broad range of requirements of sport and event customers demands high-performance IT solutions. The ERP solution **DOiT | Sport & Event** is based on Microsoft Dynamics 365 Business Central and completely supports the entire processes as well as the value creation chain of modern industries. It covers all requirements in the areas of integrated financial accounting, sales & marketing, sales processing as well as procurement / purchasing & distribution. Through the integration of highly specialized systems, such as ticketing, payment, webshop applications or document management system with workflows and the continuous development of interfaces tailored for the industry, DOiT | Sport & Event is an innovative and sustainable ERP solution specifically for your needs.

### Connect ERP with simply-X

With the new application **Sport & Event | simply-X Connect Interface** we easily connect the modules simply-x Point of Sales from simply-X to your ERP system. Benefit from the new interface, which offers you a high-performance, high-availability and secure data exchange.

Business Central (BC). Master data such as customer data, item and other important information as well as transaction data (catering sale and merchandise sale) will be imported from simply-X solution.

### Overview of Key Features

- **Master Data Transfer:** Automatic transmission of master data such as items, prices, and customers to the simply-X database to ensure that all information is always up to date.
- **Document Import:** Retrieval of sales invoices and cash register closures from the simply-X database for direct posting in Business Central's financial management.

- **Integration:** Seamless integration into Microsoft Dynamics 365 Business Central through standardized interfaces and workflows.
- **Efficiency Improvement:** Reduction of manual postings through automated data exchange using posting groups and document types.
- **Real-Time Data:** Synchronization ensures current inventory levels and sales figures in your warehouse and financial modules.

GWS

GWS
