

Products / Aadhaar Masking APIs

An AI solution which can seamlessly integrate into your Organization

[Quote Us](#)

Aadhaar Masking solution, addressing the IRDAI and RBI regulations, can be consumed as an on-premise solution or cloud base solution. Our Aadhaar Masking solution allows you to mask the UID and QR code from the documents submitted by your customers in real-time in bulk.

Our Aadhaar Masking solution is an AI-enabled solution that processes the documents on a contextual basis and its AI algorithm classifies aadhaar and non-aadhaar data and then masks UID and QR. Hence no limitations on the size of the KYC document, Orientation of the Aadhaar image, Multiple Aadhaar on a single page, and more.

Safeguard sensitive Aadhaar information effortlessly with our powerful AadhaarMask API. Seamlessly integrate our easy-to-use solution into your organization's workflow, ensuring compliance and protecting user privacy. Mask Aadhaar numbers with state-of-the-art encryption algorithms and maintain operational efficiency.

Features

- 1. Reliable :** Our Aadhaar masking solution is highly accurate and works on all aadhaar document formats like JPG, PDF, JPEG, PNG. Scale your operations effortlessly as your organization grows. Our API is designed to handle increasing workloads and ensure reliable performance, allowing you to meet the demands of your business.
- 2. Effortless Integration :** Integrate our APIs and license tools into your own applications to mask Aadhaar. Use it on-premise or on-cloud. Easily integrate our AadhaarMask API into your organization's existing systems and processes.
- 3. Advanced Aadhaar Masking :** Utilize powerful encryption algorithms to mask Aadhaar numbers effectively. Protect sensitive information from unauthorized access and maintain data privacy and security.
- 4. Cost-effective Solution :** Enjoy the benefits of a cost-effective Aadhaar masking solution that optimizes operational efficiency while protecting user privacy. Our API helps minimize manual efforts and reduces the risk of data breaches, resulting in cost savings for your organization.
