Industries
moved to Azure

Microsoft Azure is a powerful cloud platform, but maximizing its potential requires the right expertise. Think of Azure as a cutting-edge aircraft - without a skilled pilot, navigating its vast capabilities can be complex and overwhelming. That's where we come in.

HabileLabs is your Azure Co-Pilot, ensuring seamless adoption, cost optimization, and peak performance with expert guidance and hands-on support.

Azure Managed Services

Proactive management and optimization of your Azure environment for peak performance and security. Effective Cost Optimization.

Cloud Migration Services

Seamlessly transition your workloads and data to Azure with minimal disruption.

Cloud-Native Development and Automation Services

Build, deploy, and manage modern applications with speed and efficiency.

Data & AI Solutions

Unlock the of your data with advanced analytics power, machine learning, and AI. Cost effective AI solutions by Azure.

Modern Work

Empower your teams with collaborative tools and solutions for a productive and engaging work experience.

Microsoft Copilot

Boost productivity with AI-powered assistance and automation across your workflows.

— Our **Mission**

Our mission is to create easy-to-use software that helps businesses grow by solving their challenges and improving their efficiency.

— Our **Vision**

Our vision is to create a place where new ideas thrive, our team loves to work, and customers always come first.

— Our **Impact**

Driving significant business impact in Jaipur and beyond, HabileLabs achieves a 95% client satisfaction rate and a strong 52.3% CAGR, serving over 160+ businesses.

We Do

Innovative Products

01. FinHub

Accurately ensure identities and achieve seamless regulatory compliance with our comprehensive identity verification suite.

02. Aadhaar Masking

Effortlessly secure Aadhaar data with an advanced masking API for compliance across industries.

03. DocuSwift

Reliably store, share, and track electronic document with our simplifying document management for legal professionals.

04. Learnify

Seamlessly track your progress and build your workforce with engaging and customizable LMS.

05. ProGPT

Presonalized AI Agent;
Designed for Businesses.
Deployed in Minutes.

06. Event Nerve

Easily manage your event qualities with this SaaS based product.

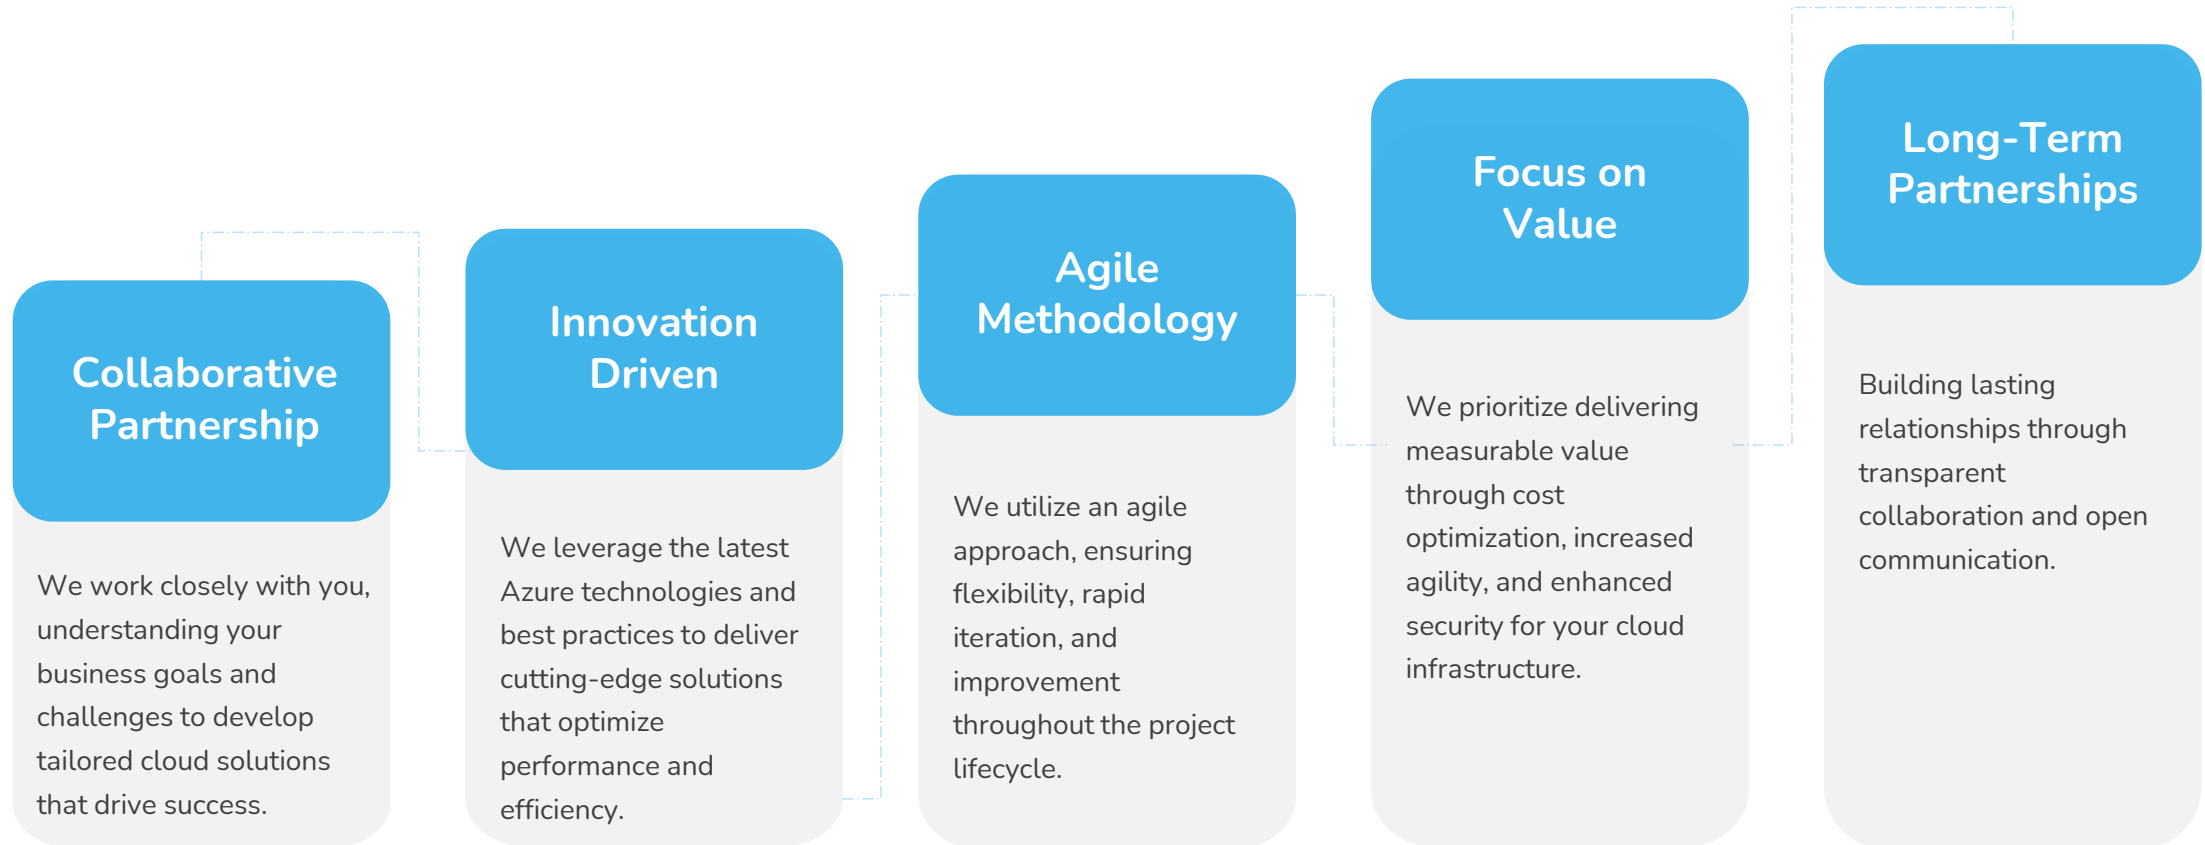

07. ISV Insights

Smartly unlock analytics from App Exchange Solutions and drive measurable real-time analytics.

CORE PILLARS

Fueling Cloud Success Stories

Success Story

Dr. B.Lal Clinical Laboratories

A leading diagnostic and pathology lab in North, India. Run 100+ Collection Centers and Many testing labs across many cities.

1

Problem Statement

B.Lal encountered significant operational inefficiencies while tracking the LIMS report, staggered database and lack of centralized approach for access-based business intelligent layer made it difficult to use the past data to curate any analysis, draw any trend. Custom effort to build one report was costly and time consuming.

Solution Delivered

To address B.Lal laboratory's operational challenges, we have onboarded them on Microsoft Power BI with Fabric. This involved onboarding them on PowerBI and centralizing their all reporting and BI needs. Inherent support of Microsoft copilot helped them generate real time insight in their datasets. Time to deliver new report or trend analysis was reduced by 80%.

Success Story

Saraswati Global Rugs

A leading name in handmade floor coverings, India's top manufacturer of premium rugs.

2

Problem Statement

Saraswati Global struggled with inefficient processes within their Microsoft Business Central system. This resulted in slow data processing, manual errors, limited scalability, and potential data silos, hindering productivity and increasing operational costs.

Solution Delivered

Migrating Saraswati Global to Microsoft Azure resolved these issues. Azure provided enhanced performance and scalability, streamlined processes through automation, improved data accessibility and integration, and offered a more reliable and secure platform for future growth.

Success Story

Kansoft Solutions Pvt. Ltd.

A top-tier IT outsourcing and software development company, delivering tailored digital solutions globally.

3

Problem Statement

Kansoft experienced significant operational challenges characterized by frequent performance spikes, disruptive downtime, and multiple underlying inefficiencies within their existing IT infrastructure. These issues negatively impacted their service reliability, productivity, and potentially their bottom line.

Solution Delivered

To address these critical operational problems, Kansoft underwent a strategic migration of their entire IT infrastructure onto Microsoft Azure. This transition to a robust and scalable cloud platform effectively resolved the performance spikes and eliminated the disruptive downtime. Furthermore, Azure's modern architecture and diverse service offerings provided the foundation to streamline operations, optimize resource utilization, and address the multiple inefficiencies that were previously hindering Kansoft's performance.

Success Story

Marsons Energy Private Limited

A trusted manufacturer of power and distribution transformers, empowering infrastructure with reliable energy solutions.

4

Problem Statement

Marson's Energy, a growing transformer manufacturer, faced escalating data backup challenges. Their on-premises system struggled with increasing backup sizes, risking storage capacity. The lack of tiered storage led to high costs by storing all data on expensive drives. Constant hardware upgrades also created operational overhead.

Solution Delivered

HabileLabs implemented an Azure Blob Storage solution for Marson's Energy. This offered unlimited scalability, resolving capacity issues. Azure's tiered storage (Hot, Cold, Archive) optimized costs by moving less accessed data to cheaper tiers. Azure's management tools also streamlined backup administration, reducing manual effort. This resulted in significant cost savings, improved scalability, enhanced efficiency, and increased reliability. HabileLabs' expertise ensured a smooth and effective implementation.

What's Next?

Let's Build Your Azure Success Together.

Initial Consultation

A collaborative discussion to understand your business needs, cloud goals, and potential challenges. We'll explore how Azure can empower your organization and answer your initial questions.

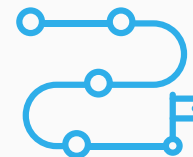

Assessment Workshop

A deep dive into your current IT environment, workloads, and security posture. We'll identify opportunities for optimization, cost savings, and innovation using Azure services.

Proof of Concept

Offer a low-risk, time-bound approach to validate the feasibility, performance, and value of a proposed solution - helping you make informed decisions before committing to full-scale implementation.

Implementation Roadmap

A hands-on demonstration of Azure's capabilities tailored to your specific use case. We'll build and deploy a pilot project to showcase the value and feasibility of Azure for your business.
