

Cloud Service Provider (CSP)

How a CSP can bring clarity to your cloud strategy

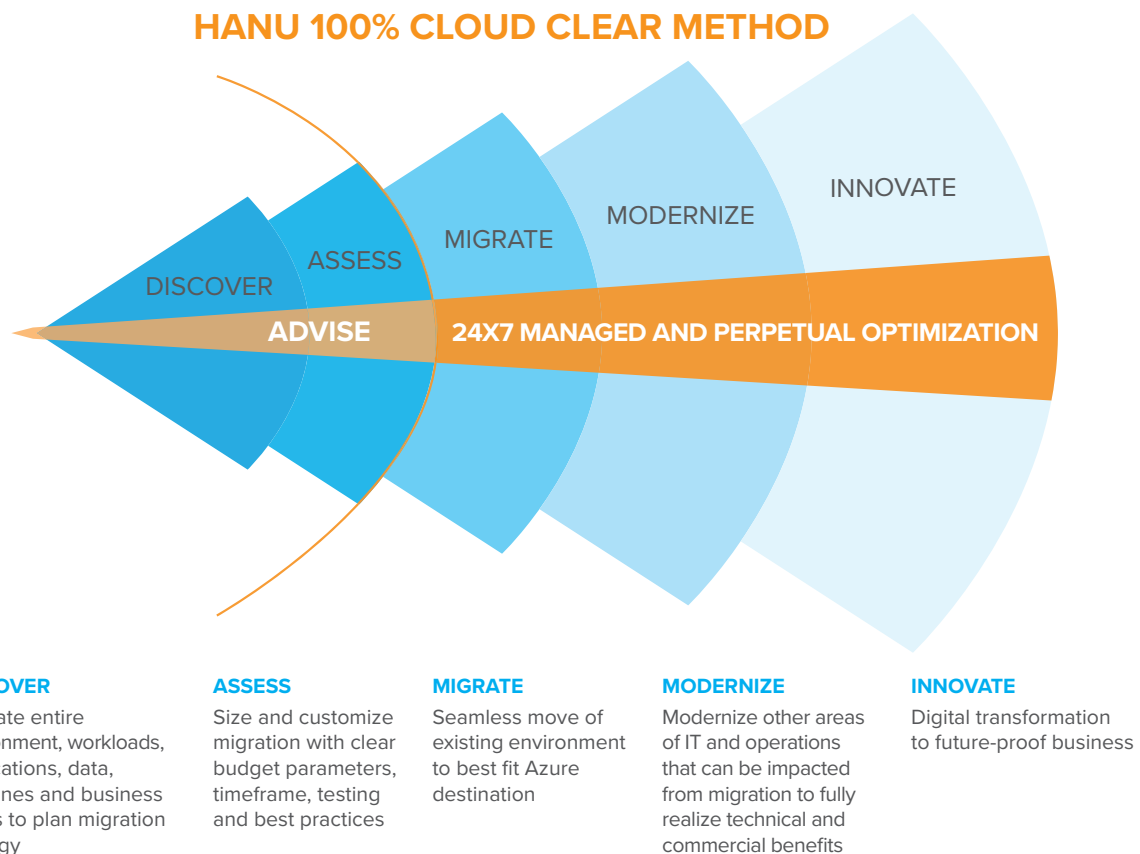

As businesses prepare plans for their future IT needs, one trend is clear: cloud will be front and center. Your business runs on data, and understanding the right cloud management strategy-fit for your business is a crucial step to achieving your organization’s ongoing success.

Internal IT departments often don’t possess the skills to effectively monitor and maintain a cloud environment, making it susceptible to security threats, data loss and costly downtime.

A CSP possesses extensive cloud knowledge to support your environment or fill in the management gaps and can minimize cost and exposure while maximizing security, scalability and return on investment.

HOW TO CHOOSE YOUR CSP

A perfect fit comes from understanding the CSP methodology and assessing the reliability and breadth of capability to which you entrust your applications and data. As a Microsoft Azure Expert CSP, Hanu deploys a 100% cloud clear method to meet your requirements and business needs on a global scale.

BENEFITS OF A CSP

Scalability

Gain scalability and flexibility without physical constraints of on-premise server limitations.

Cost Saving

Switch from CAPEX to OPEX by removing costly infrastructure maintenance costs.

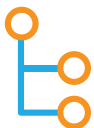

Future Proof and Secure

Ensure industry recommended security requirements and compliance practices are met.

Customization

Customization through server configuration and responsive load balancing to meet changing demands.

Recovery

Rely on multiple data centers with proven redundancy and resiliency to maintain business continuity.

KEY HANU FACTS

Microsoft Azure Expert MSP and CSP

Large scale deployment expert

DevOps customization specialist

Multi-cloud integration with Azure

Pre-Sales Assessment and Advisory

100% scalability, agility and transparency

15+ year Microsoft Partner

Exclusively Azure for 8+ years

Enhanced Microsoft intelligence and support

HANU ADVANTAGE

Hanu's consulting and managed services operates as a true extension of your company's IT team, offering 24x7x365 support. Leveraging best-in-class processes and technologies, Hanu provides Azure governance solutions to create seamless cloud integration and management for clients of any size, across any industry.

Identify Performance Bottlenecks

- Assess cloud infrastructure for performance and usage
- Review security practices
- Validate networking configuration

Understand Risks, Assure Readiness

- Identify and rank areas of concern
- Validate patch level deployments
- Readiness reports for Hanu managed services

Implement Best Practices

- Security practices and compliance
- Governance and escalation
- Maintenance, access and authorization
