

# GDPR- Are you compliant yet?

Non-compliance can cost you!

If you are an organization which deals with the personal data of European/UK nationals while offering services – sit up and take notice. You need to be GDPR compliant. This is irrespective of whether your organization resides in the EU/UK region or not.

## What is GDPR Services?

An end-to-end service to get compliant to GDPR while providing a road map from assessment to remediation including process & technical control rollouts where necessary to protect PII data. GDPR core team-well versed with consulting, end to end remediation and DPO functionalities will use their technical expertise to ensure all the mandates of GDPR are met.

This is achieved by leveraging the existing Microsoft products in your infrastructure and tweaking the functionalities to meet compliance.

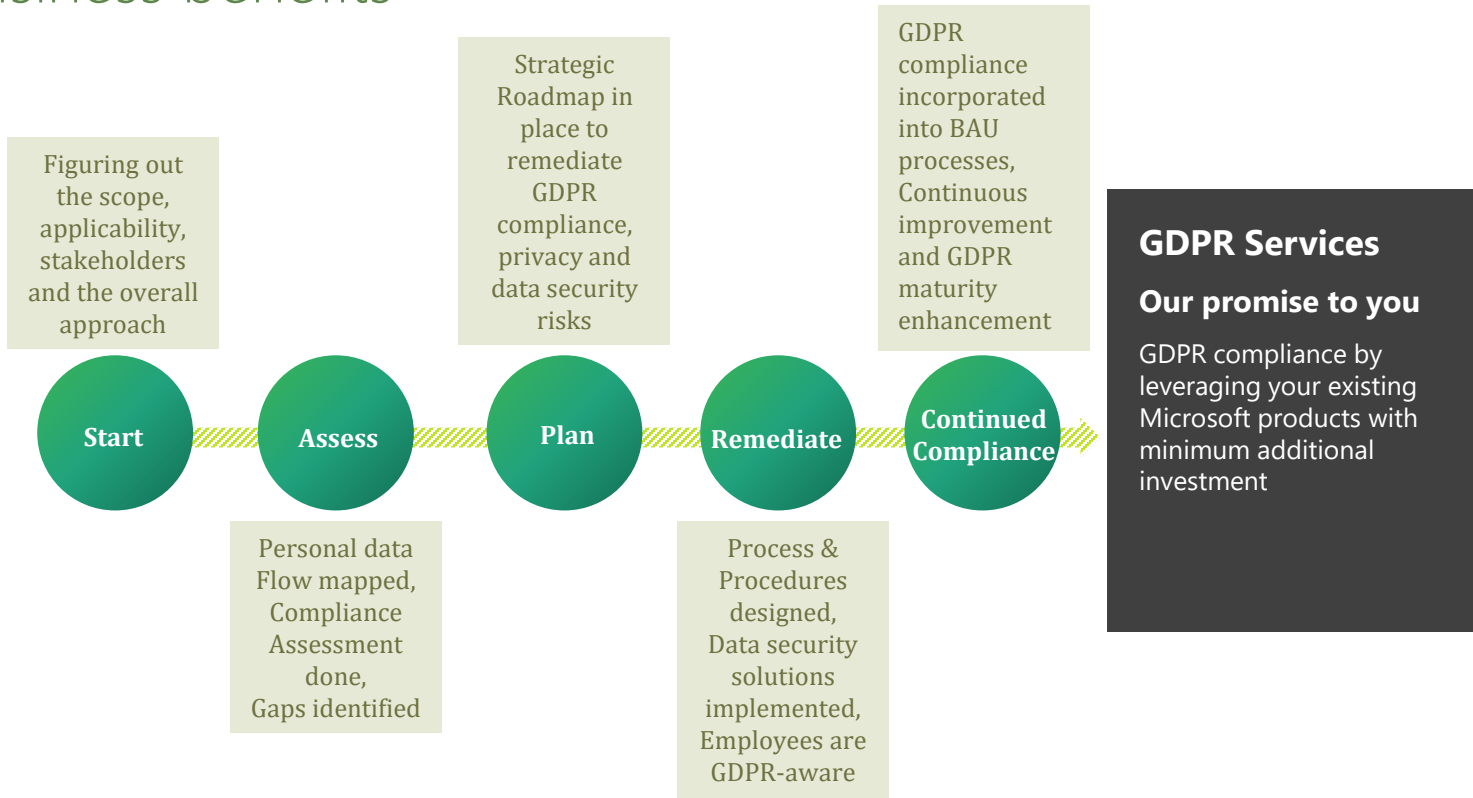

## Why customers use GDPR Services?

- Consulting exercise resulting in GDPR Gap Assessment Report with article mapping and proposed remediation approach
- End to End remediation – both manual and tool based to ensure features such as Privacy by Design/Default are completely incorporated for complete compliance with minimum effort – by leveraging existing products in your infrastructure
- Continued GDPR compliance by policy enforcements, periodic audits/reporting and DPO-as-a-service offering
