Main Problems That Will Be Solved

Asset Tracking and Maintenance: Efficiently tracking assets, their location, usage, and maintenance schedules will optimise their lifespan and reduce downtime.

Compliance and Risk Management: Ensuring regulatory compliance and minimising risks associated with asset failure and safety violations through standardised processes and documentation.

Enhanced Asset Visibility: Providing comprehensive insights into the location, condition, and usage of assets, ensuring efficient utilisation and minimising losses.

Over 2000 Clients in 121 Countries

Actionable Intelligence When Certainty Matters

How does Hardcat Deliver Efficiency?

Make certainty second nature

Proactively handle regulatory demands with comprehensive company-wide controls and detailed reporting.

Real-time reporting for complete visibility

Real-time, searchable asset data gives you over 200 standard reports at your fingertips and a custom report writing tool. Create simple dashboards and automated alerts to access what's important to you and have complete visibility and control of your assets at home or in the field.

Boost collaboration, access intelligence from anywhere

Cloud-hosted SaaS options are accessible on any web-enabled device. The smartphone and tablet application provides mobility and accessibility no matter where you are.

Reliability and longevity

The cornerstone of equipment maintenance lies in accurately tracking and recording regular inspections, servicing, and timely repairs to ensure reliability and longevity.

Build sustainability directly into your business

Modify operations and processes to consistently minimise emissions, waste, and environmental footprint.

Benefits of using Hardcat

- Fraction of the cost of equivalent large ERP systems
- Quick and easy to set-up and tailor to meet customer requirements
- Robust, established technology, proven in diverse markets and industry sectors
- Industry standard architecture providing effortless data sharing and dissemination
- One powerful database that can be segregated for different uses or projects
- Simple user interface allowing a short learning curve
- Modular and affordable implementation options
- Serious pedigree with reputable clients in over 120 countries
- GIS mapping integration allows users to see asset locations as well as maintenance works
- Access security allows restricted views e.g. user cannot see financial information
- Complete audit trail showing before and after values: ability to retrace steps
- Powerful Boolean search allowing rapid and relevant access to all data fields
- RFID and QR Code ready
- Scalable and configurable
- Smooth integration with other systems and products
- Ability to generate reporting outcomes to demonstrate compliance
