Application portfolio **assessment**

Nash Tech.

What we do

We provide an expert assessment of your application portfolio to give you visibility and control over your business agility and transformational roadmap.

Whether it's migration to public cloud providers such as AWS and Azure, or refactoring, rebuilding or retiring individual applications, we collaborate with you to ensure every detail is considered. We get rid of any technical debt weighing you down and identify meaningful improvements that can have the most return on investment and ensure your applications estate it is efficient, dependable, and fit for purpose.

Benefits

Better assess the effectiveness of your application portfolio

Identify security improvements, reduce inefficiencies and costs, and develop a strategy for automation tooling.

Determine whether applications are meeting the needs of the business and technical goals, validate a business case for change and support innovation in your IT estate.

Whether you're embarking on a cloud modernisation journey or thinking of outsourcing IT operations, compliance or IT audits, we help you see through a fresh lens to take advantage of active opportunities and make informed decisions about the future.
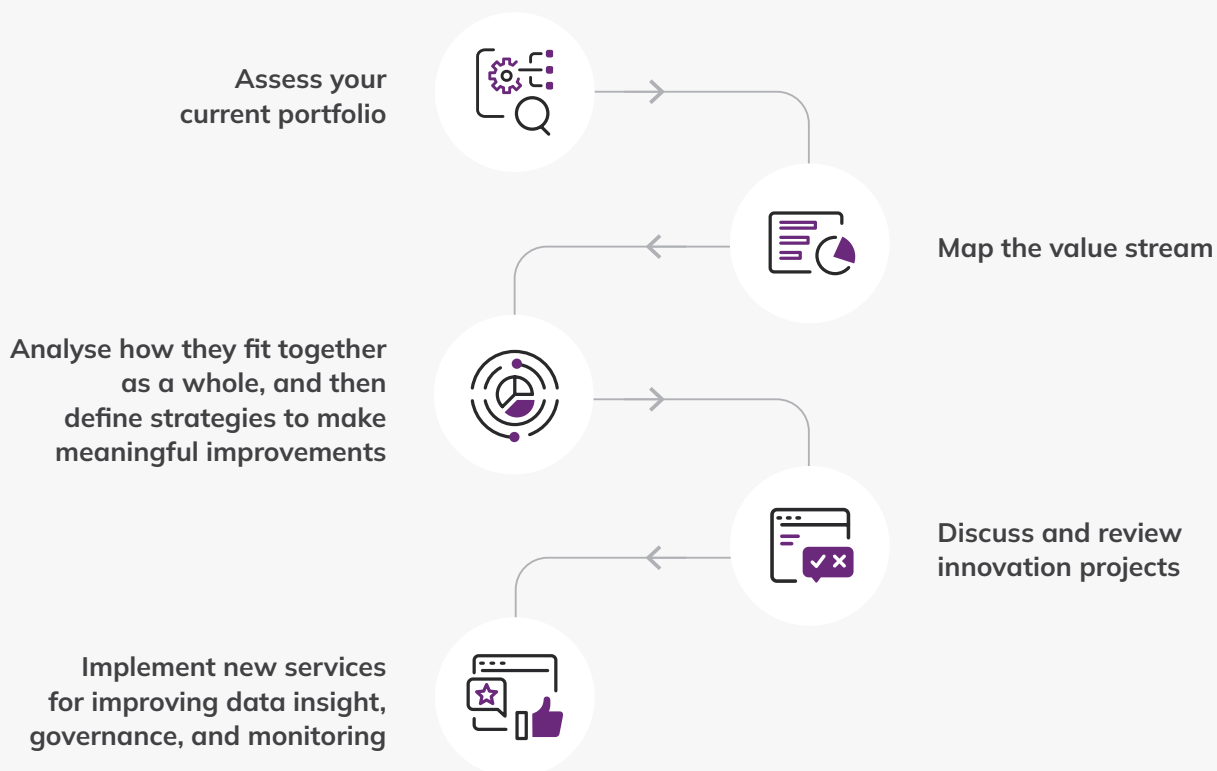

Our process

Applications estates grow in size and complexity over time. We work with you to help you understand the value of your applications and, more importantly, where the issues are and how the most value can be leveraged.

Our advisory team review and recommend innovation projects, such as making use of DevOps tooling, reducing dependency on manual processes and people, and implementation of new services for better data insight, governance, and monitoring.

Supported by specialist tools, we help you to build and implement a roadmap for improvements and priorities, based on business and technical goals.

Assess your current portfolio

Map the value stream

Analyse how they fit together as a whole, and then define strategies to make meaningful improvements

Discuss and review innovation projects

Implement new services for improving data insight, governance, and monitoring

Why NashTech

Our team of experts provide you with end to end solutions – from assessment through to modernisation, maintenance and support.

We are experts in using assessment and cloud modernisation toolsets, while being technology agnostic to ensure we are providing the best direction for your business and saving your organisation time and money when making decisions about your application portfolio.
