

XDR Discovery Workshop

Analyze. Innovate. Implement.

Not sure which security technologies and services to choose? Join our free 2-hour Managed XDR Discovery Workshop. This session will help you decide if Managed XDR by Heartland Business Systems (HBS) is right for your organization.

Our Managed XDR service combines the expertise of our U.S.-based SOC team with Microsoft Sentinel (SIEM) and Microsoft Defender for Endpoint (EDR). This integrated system intercepts threats early and adapts to new challenges. We provide 24x7 support through our HBS Security Center.

Workshop Agenda

1. Discuss Your Current and Desired state (45 minutes)

We'll work with you to understand your current cybersecurity posture and discuss solutions for threat protection of your extended technology ecosystem.

2. Explore HBS Managed XDR (30 minutes)

We'll explore the features of HBS Managed XDR—considering your current setup and future goals. This way, you can see if XDR is the right fit for your organization.

3. Microsoft Licensing Review (15 minutes)

We'll explore potential AI solutions that align to your business goals and challenges – showing how they can address your needs and deliver measurable benefits.

4. Microsoft Sentinel & Defender for Endpoint Demo (30 minutes)

We'll provide a demonstration of Microsoft Sentinel and Defender for Endpoint, showcasing their functionalities and how they can be leveraged to protect your organization.

What You'll Get

Workshop Summary Report

- Outline of current and desired state
- XDR capabilities that align to your goals
- Estimated costs

Schedule your XDR Discovery Workshop.
