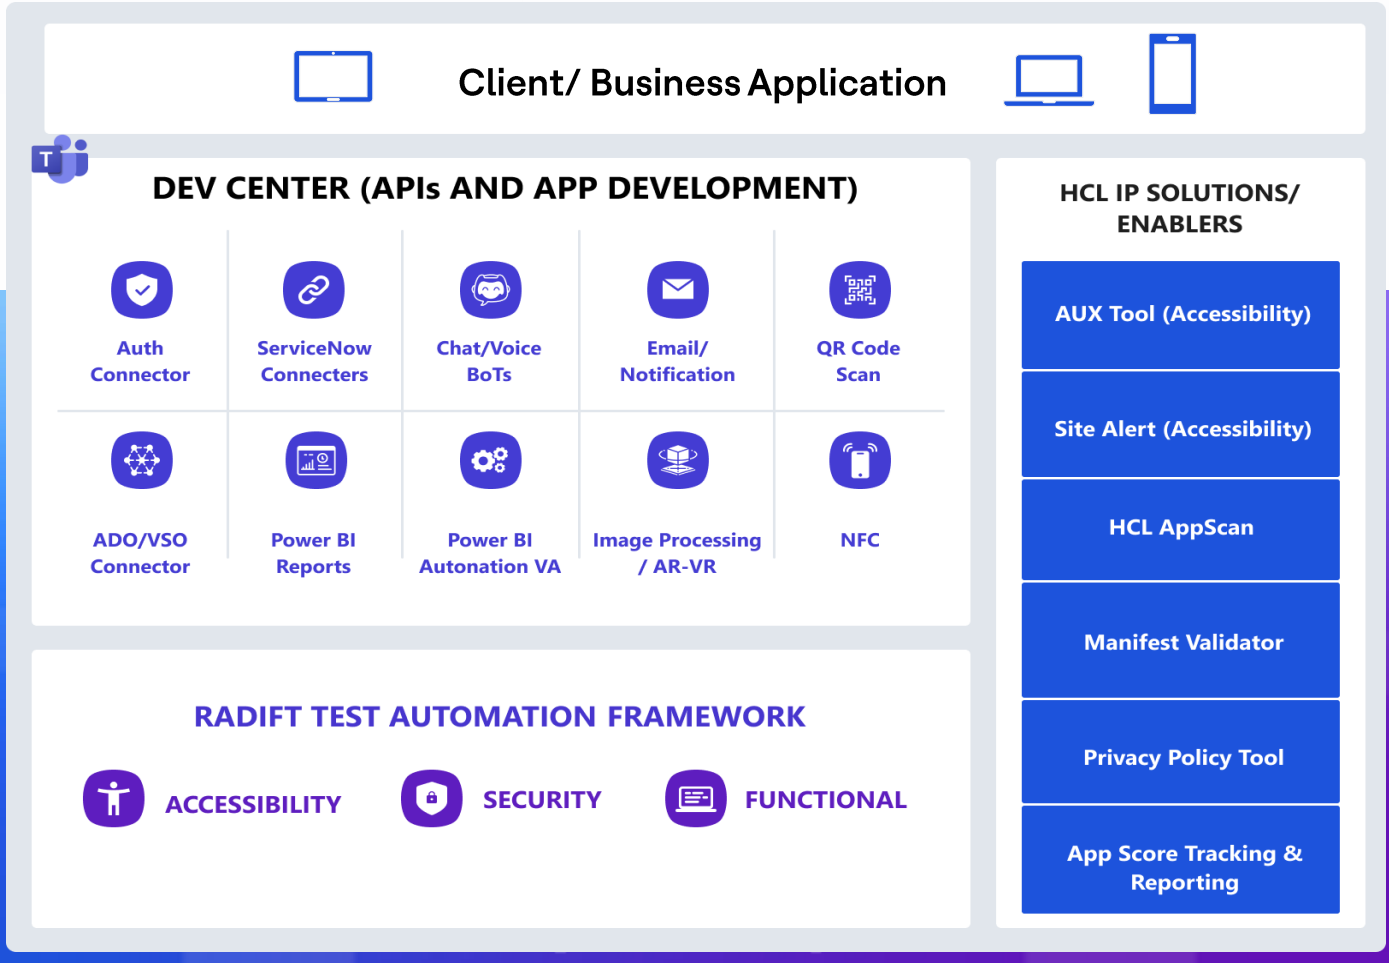
RADIFT

Rapid Application Development and Integration Framework for Teams

Reusable Framework for Development Acceleration

Introducing RADIFT

Rapid Application Development and Integration Framework for Teams adds momentum to your Teams Application development through automation, integration, tests and validation. It comes with a unique blend of components and reusable libraries with 80% readily available codes and 10-20% customizations as per client's needs, RADIFT is capable to rapidly deliver business value through quick Teams Application development, achieving technological excellence by leveraging Application Development API's, Functional, Security & Accessibility Testing along with our expert HCL IP Solutions.



BENEFITS TO BUSINESS

01 **Accelerated Application Development**
Utilizing a vast set of reusable components to make the end-to-end app development process swift & streamlined.

02 **First Time Right & Quality Control**
Expertly maintained app development center ensures accurate, low-error results.

03 **Time to market**
Enables faster TTM to gain first-mover advantages.

04 **Compliant and Inclusive**
Functional, Accessibility & other testing services to safeguard compliance & inclusivity requirements.

05 **Cost optimization**
10-15% cost optimization with maximized business application.

06 **Scalable Framework**
Designed to seamlessly adapt to changing needs

FEATURES

APIs
