

## ExpressRoute Services - Key Benefits offered Include:

- I. Layer 3 connectivity between client on-premises network and MS Cloud through a connectivity provider. Connectivity can be from an any-to-any (IPVPN) network, a point-to-point Ethernet, or through a virtual cross-connection via an Ethernet exchange.
- II. Dynamic routing between client network and Microsoft via BGP.
- III. Built-in redundancy in every peering location for higher reliability.
- IV. Connection uptime Service Level Agreement.
- V. Connectivity to Azure cloud services across regions.
