HCL BigFix Enterprise+

Fast-tracking your IT security.
Where cybersecurity meets intelligent automation.

HCL BigFix

The modern enterprise landscape has many complex challenges. Enterprise leaders like you struggle with delivering innovation amidst tight budgets, ensuring employee productivity even between disjointed systems and platforms, and safeguarding your brand against escalating cyber threats.

Traditionally, addressing these challenges required deploying various point solutions, creating a disconnected, unmanageable network of tools.

HCL BigFix Enterprise+ offers a paradigm shift.
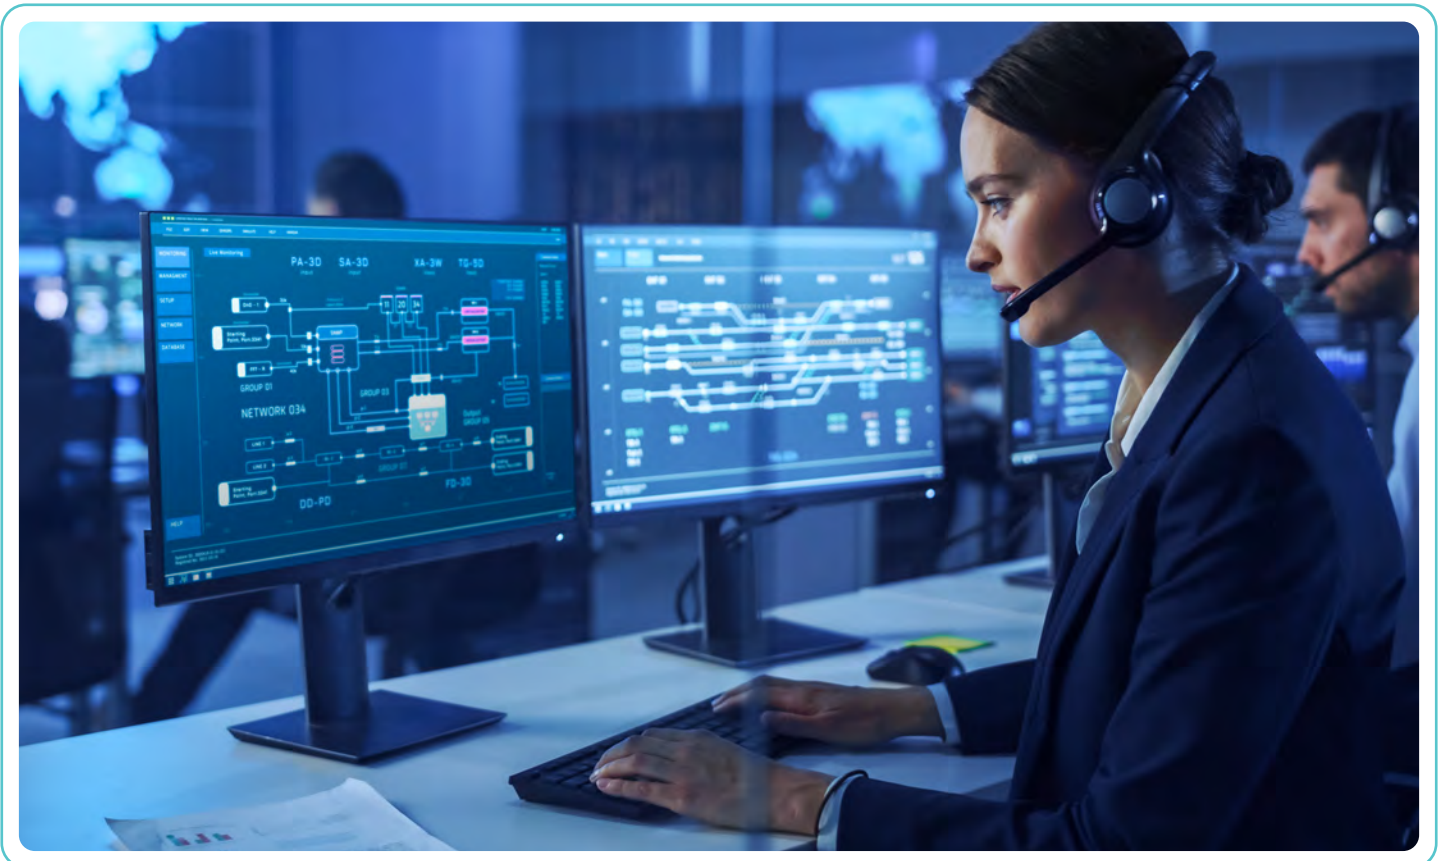

HCL BigFix Enterprise+ is an intelligent hybrid infrastructure automation offering that leverages artificial intelligence (AI), cybersecurity, automation, and analytics capabilities to proactively secure servers and remediate vulnerabilities in real-time. HCL BigFix empowers IT leaders with a swift return on investment, closing gaps and establishing a resilient, secure enterprise.

Ensuring continuous compliance and prompt responses to IT incidents, HCL BigFix offers extensive out-of-the-box compliance checklists alongside robust analytics and reporting capabilities. It stands out as a single, unified solution, excelling in finding, measuring and fixing a diverse range of IT and security issues. HCL BigFix provides the fastest remediation and near real-time status for all endpoints. The platform also offers solutions for over 100 operating system versions of Windows, Linux, UNIX, and macOS.

HCL BigFix also includes intelligent runbook automation. Leveraging AI and machine learning (ML), it facilitates end-to-end incident remediation and task automation for a responsive and resilient enterprise. This enables rapid attainment of zero-touch automation by employing ML and natural language processing (NLP) to comprehend issues, recommend corrective actions, and initiate automatic resolutions. Utilizing a substantial repository of configurable and reusable automations, HCL BigFix ensures robust end-to-end incident remediation and task automation across the entire infrastructure and applications landscape.

"With HCL BigFix, we effectively oversee a network of over 7,000 servers, realizing a remarkable 20% decrease in management expenses and an impressive 77% reduction in open vulnerabilities."

Leading bank

The BigFix Enterprise+ impact:
# Measurable results, unmatched potential

Unmatched precision:

- ◆ Realize >98% first patch success rate
- ◆ Gain complete visibility of servers located on-prem and in AWS, GCP, and Azure clouds
- ◆ Achieve <1% non-compliant endpoints

Consolidation powerhouse:

- ◆ Replaces an average of 6 existing point products
- ◆ Reduce software speed by USD 500,000 annually and avoid >USD 1M in vendor-imposed fines
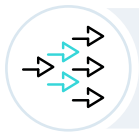

Agility unleashed:

- ◆ Reduce compliance audit response from 2 weeks to just 5 minutes
- ◆ Slash vulnerability exposure risk reporting time by a staggering 98%

BigFix Enterprise+ capabilities:
The all-in-one infrastructure management offering

- ◆ **Lifecycle management:** Streamline control from provisioning to decommission.

- ◆ **Compliance management:** Continuous compliance with industry benchmarks and regulatory requirements.

- ◆ **Vulnerability management:** Mitigate vulnerabilities and reduce cybersecurity risk in real-time to protect all your enterprise servers.

- ◆ **Inventory management:** Comprehensive tracking of all assets including hardware, software, and licenses, across on-premise and cloud environments.

- ◆ **Out-of-the-box remediation content:** Extensive support for rapid issue resolution.

- ◆ **AI-driven incident resolution:** Utilize AI for quick problem-solving.

- ◆ **Zero-touch automation:** Achieve automation without manual intervention.

- ◆ **Intelligent identification of automation candidates:** Identify areas for efficient runbook automation.

Download the HCL BigFix Enterprise+ data sheet for more information.

Beyond the ordinary:
What sets BigFix Enterprise+ apart

- ◆ **World's largest automation library –** Leverage 500K+ out-of-the-box automations – the most comprehensive selection available.

- ◆ **Compliance compliance –** Maintain real-time compliance with industry standards like CIS, DISA STIG, FDCC, USGCB, PCI DSS, and more.

- ◆ **Industry specific compliance –** BigFix supports ISO, HIPAA, NIS2, DORA, RBI, and many other compliance frameworks, tailoring to your specific needs.

- ◆ **Extensive customization –** Tailor BigFix to support your unique IT environment using custom actions, automation, reports, dashboards, and workflows to perfectly match your requirements.

BigFix Enterprise+ benefits:
Empowering every role in your organization

C-suite success

- ### 01. Accelerate: *Facilitate faster innovation*
  Accelerate your innovation with the market's biggest library of automation, ensuring your organization maintains a competitive edge with less effort. Experience cost savings and a reduction in dissatisfaction as you speed up your journey toward success.

- ### 02. Consolidate: *Unify security-driven excellence*
  Unlock the power of a secure-by-design offering that seamlessly integrates more AI, automation and unified end point management (UEM) capabilities than any other market solution, often eliminating multiple other tools. Our consolidated offering establishes a robust IT foundation, streamlining operations and enhancing efficiency for a unified, secure experience.

- ### 03. Collaborate: *Break enterprise silos, foster harmony*
  Align C-Suite, IT, and Security with the only vulnerability remediation solution that combines threat intelligence and instant exposure analysis into one package, delivering quantifiable risk reduction. Our exclusive collaborative approach protects your brand and empowers informed decision making.

Future-proof IT

- ### 01. Speed time-to-value
  Empowers IT leaders to swiftly realize value through prompt implementation of AI and automation, optimizing overall IT efficiency.

- ### 02. Optimize costs
  Effective IT infrastructure cost management contributes to budgetary control and resource optimization.

- ### 03. Improve cybersecurity resilience
  Proactive vulnerability detection and security measures establish a resilient enterprise environment, reducing risks and potential threats.

- ### 04. Ensure compliance
  Achieve and maintain continuous compliance, mitigating regulatory and industry standard risks.

Operational Excellence

- **01. Focus on strategic initiatives**

  AI-led automation of routine tasks enhances operational efficiency, allowing IT teams to focus on strategic activities.

- **02. Drive swift incident response**

  Enables IT operations to respond swiftly to security incidents in near real-time, minimizing downtime and potential disruptions.

- **03. Speed value realization**

  Quick implementation timeline and extensive out-of-the-box support contributes to rapid value realization.

- **04. Promote adaptability**

  Extensive repository of reusable runbooks ensures adaptability to various scenarios, streamlining operations.

- **01. Reduce downtime**

  AI-assisted swift incident response and proactive cybersecurity measures minimize downtime, ensuring a seamless end user experience.

- **02. Improve security**

  Proactive vulnerability detection and security initiatives create a secure IT environment, instilling confidence in end users.

- **03. Optimize efficiency with AI**

  Leverage the power of AI to automate routine tasks, ensuring not only efficiency in IT services but also contributing to a seamlessly optimized experience for end-users.

- **04. Minimize disruptions**

  Zero-touch automation minimizes disruptions, providing end users with a stable and reliable computing environment.

Empower every level of your organization with HCL BigFix Enterprise+.
