

# Health Catalyst Ignite™ Data and Analytics

A Next-Generation Data and Analytics Ecosystem with Integrated Healthcare Expertise

## Empowering Data-Driven Healthcare

Transform your healthcare data into actionable insights, enhancing clinical outcomes, operational efficiency, and financial results.

### What It Is:

A comprehensive healthcare data and analytics ecosystem designed to empower decision makers with timely, accurate, and actionable data.

### What It Does:

- **Automate:** Streamline data collection, cleansing, and normalization tasks.
- **Enrich:** Provide contextual insights for informed decision-making.
- **Integrate:** Break down data silos for seamless access and analysis.

We combine best-in-class technologies, healthcare-specific data models, self-service tools, and industry expertise to drive massive, measurable improvements.

### What It Means:

#### Better Decision Making

- Transparent self-service data and analytics.
- Unified healthcare data products.
- AI decision support within BI tools.

#### Faster Insights

- Reduced repetitive data management tasks.
- Streamlined ingestion (300+ source templates).
- Pre-built standard APIs.

#### Maximized Investment

- Scalable and seamless integration for enhanced efficiency.
- Simplified processes and tools to streamline operations.
- Flexible and healthcare tailored solutions.

### Real Results:

- \$32.2M cost reduction through AI-enabled care management.
- \$10M AI-enabled variable cost reduction.
- >\$3M indirect labor cost savings.

See What  
Our Clients  
Are Achieving

*"Health Catalyst gives us the actionable data we need to support clinical transformation throughout our system. Not only have we saved money, we have been able to positively impact thousands of patient lives."*

Neal Chawla, MD, FACEP

Chief Medical Information Officer, WakeMed Health and Hospitals

## Data & Analytics

### Data Management Tools and Functions:

- Source Templates
- Job Scheduling
- Data Profiling
- 24x7 Support
- Identity Management

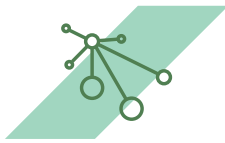

### Data Products:

- Foundational Expert Data Collections
- Terminology
- Unified Data Governance

### Self-Service Tools:

- Pop Analyzer
- Healthcare.AI
- Data Entry
- Visualization Tools

## The Ignite Difference: Designed for Healthcare

### Integrated Data:

Seamlessly integrates clinical, operational, and financial data to support healthcare's most important use cases.

### Embedded Expertise:

AI enriched with healthcare knowledge to streamline operations and minimize routine data handling duties.

### Self-Service Tools:

Accurate and timely data in user-friendly formats empowers healthcare professionals to make informed decisions.
