hopit Stream

Connect your machines to the cloud, stream realtime data to a central data lake and view it on a ready-to-use dashboard. Connecting machines from a variety of vendors is the basis of data integration.

- Improve Efficiency
- Machine Monitoring
- Data Integration

hopit Operate

Hopit Operate enables software rollout and management at scale. We cover the whole development and operations process including device provisioning, software versioning and real-world unit-tests.

- Device Provisioning & Management
- Remote Access
- Industrial DevOps Pipeline
