Heeddata

Manage & Contain Multi-Cloud Costs

ORACLE CLOUD

Microsoft Azure

Google Cloud

aws

Integrations

- Oracle Cloud
- Microsoft Azure
- Google Cloud
- AWS

Freedom to choose - Choose cloud services that best your business from **Oracle**, **Azure**, **Google**, & **AWS**

Heeddata

Cost Map
Heeddata costs map provides a visual representation of cloud spends on a geo map. Using this information you will be able to instantly track cloud spends across geographical locations and departments

AI / ML Recommendations
Get information about *obsolete IPs*, *insecure security group settings*, *non-utilized VMs, orphan services* and more. Optimize cloud usage with the help of the information and save costs too.

Cost Explorer
Get comparative expenses for selective periods. Heeddata also provides much deeper granular level expenses breakdown by sources, pools, owners, and geographical locations.

Cloud Cost Governance
Get information about *obsolete IPs*, *insecure security group settings*, *non-utilized VMs, orphan services* and more. Optimize cloud usage with the help of the information and save costs too.
