Project Overview

Microsoft Cloud for Nonprofit

Data Migration Assessment

Core Activities:

Pre-Workshop Discovery Call

We will conduct a pre-workshop call to review existing data sources and understand how much data your organization is storing. We'll also assess your data needs across your organization.

Review Your Data

We will take a look at your data requirements and provide you with data insights.

Overview of the Nonprofit Common Data Model

We will provide your team with an overview of the Nonprofit Common Data Model.

Dataverse, Data Warehouse and Understanding Data Strategy

During a session, we will teach you how to leverage technologies like Dataverse and Data Lakes to build data environments that help you gain insights and value from your data.

Data Strategy Presentation

We will present your data plan so that you walk away understanding your next steps forward to migrate and modernize your data estate.
