

Security Controls Review

Our Mission

To **simplify** the complex world of IT and Cyber Security

What is the SCR?

Our **Security Controls Review** is fixed price consulting engagement whereby The Missing Link will assess your IT environment, report on your **current** security maturity, and provide a **roadmap** to achieve **target** maturity.

Microsoft – our cyber security ally

Anything less than comprehensive security is no security at all, here is why we partner with Microsoft for cyber security:

1. We both have a strong commitment to cyber security, including world-class security and expertise dedicated to making their products and services better.
2. Microsoft is powered by Microsoft, investing over \$1 billion annually on building security into their core technologies like Windows, Office and Azure, which our clients use everyday.
3. Microsoft takes a three-fold security approach; comprehensive platform, intelligence and partners – security is not a problem that can be addressed alone; we partner with Microsoft to help us raise the bar across the industry.

Our Differentiators

20+ Years

20+ years' experience providing IT and cyber security services to Australian SMBs.

Onshore Team

The whole team from engineers to administration are all based in Australia.

SMB Focus

Our solutions are designed specifically for SMBs. Our proprietary model is thorough, yet cost effective, based on industry best practice.

Experts

With 25+ awards in the last few years, we are recognised in the industry as experts.

300+

With 300+ Security Assessments delivered in the last year, we can benchmark your organisation so that you can become best in class

Our Process

Assess

Understanding where you are and where you need to be is the key to successful IT

Improve

With a plan in place you'll be confident nothing is left to chance

Manage

We'll take care of the day to day, leaving your team free to focus on your business rather than your IT
