ANGULAR NES

Never-Ending Support for Angular by **herodevs**

STAY SECURE ON ANGULAR V4-17 WITHOUT MIGRATING

Are you stuck on an unsupported version of Angular? Migrating to the latest Angular version distracts from achieving business goals and building new features. With NES Angular you can continue running any version of unsupported Angular for as long as you need while staying supported and secured.

Continuous source code scanning for vulnerabilities

Our proprietary scanning tools monitor for security vulnerabilities continuously, so you can rest easy knowing your Angular applications, no matter the version, remain secure

Security fixes within 15 days of vulnerability discovery

When we find a vulnerability or incompatibility, we create a fix, test it, and release it within 15 days of discovery

All package data stays in your network

With our on-prem license delivery, you don't have to worry about any package data leaving your network when you install Angular NES
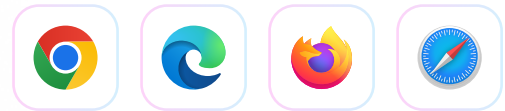

CORE CONTRIBUTORS

Miško Hevery
Creator of Angular & Qwik

Misko serves as a Consultant Developer and Angular Expert at HeroDevs and architects security solutions for Angular Never-Ending Support in conjunction with HeroDevs security team.

This is a **drop in replacement for Angular** that is going to be continually updated with security patches and it only takes **5 minutes** to switch to our version

SLA & REGULATORY COMPLIANCE

Do you have an SLA with your clients to not ship unsupported libraries? Do you have FedRAMP, PCI, HIPAA, or other compliance concerns?

Our clients breeze past such concerns by having Angular NES – a fully supported and secured software library.
