

NES FOR .NET

HeroDevs' Never-Ending Support (NES) for .NET  **herodevs**

KEEP YOUR .NET 6 APPLICATIONS SECURE AND SUPPORTED—INDEFINITELY

.NET 6 reached end-of-life on November 12, 2024, leaving thousands of applications without security updates or compliance assurances. HeroDevs' NES for .NET extends the life of your applications with ongoing security patches, & compliance support, allowing you to maintain mission-critical systems without rushing into costly migrations.

WHY NES FOR .NET?

Security Without Gaps

We deliver security patches beyond Microsoft's official support window, protecting you from emerging threats.

Regulatory Compliance

Stay aligned with FedRAMP, HIPAA, SOC 2, and other security frameworks, ensuring risk-free audits.

Seamless Drop-In Replacement

No code rewrites needed—.NET NES installs effortlessly, keeping your stack running smoothly.

AVOID THE RISKS OF RUNNING EOL SOFTWARE

Upgrading to the latest .NET versions often introduces breaking changes that require significant code refactoring, disrupting workflows and delaying critical projects. Without security updates, end-of-life .NET 6 applications become a liability, increasing exposure to breaches, compliance violations, and operational failures.

NES for .NET is a **drop-in-replacement** for .NET that is continually updated with security patches and with little difficulty can be installed

TRUSTED BY 800+ CLIENTS

We've worked with companies across a variety of industries, from government and public sector to healthcare and higher education.
