HEXAGON

Metrology Asset Manager
nexus APP

Optimise CMM utilisation with real-time asset dashboard and notifications

Real-time performance data in a user-friendly centralised dashboard, now as standard

Your new coordinate measuring machine (CMM) is enhanced with the latest IoT technology, helping you increase the productivity of your metrology assets and processes.

Metrology Asset Manager Advanced enables you to track utilisation of your equipment, identify bottlenecks and spare capacity, and anticipate and avoid problems. Whether via desktop or the mobile app, Metrology Asset Manager Advanced gives you the data you need, when you need it, wherever you are.

Utilisation
real-time asset dashboard showing machine status

Notifications
real-time alerts of critical events (e.g. enviromental conditions)

Performance
easy access to program run data, historical data and summary reports

Add value to your quality systems.
