

Smart measurement Smart monitoring

Real-time performance data in a user-friendly centralised dashboard, now as standard

Your new portable coordinate measuring machine is enhanced with the latest IoT technology, helping you increase the productivity of your metrology assets and processes.

Metrology Asset Manager Advanced enables you to track utilisation of your equipment, identify bottlenecks and spare capacity, and anticipate and avoid problems. Whether via desktop or the mobile app, Metrology Asset Manager Advanced gives you the data you need, when you need it, wherever you are.

Securely monitor and manage device performance

Customisable real time notifications of critical events

Easily locate individual or fleets of portable assets with GPS tracking

Add value to your quality systems.
