Lotus Domino to Power Apps Migration

Why Power Apps?

Legacy Domino Apps are usually not accessible without a VPN and are not mobile enabled. Microsoft Power Platform combines the strength of PowerApps, Power Automate, Power Virtual Agents, Power BI, into one powerful business application platform. PowerApps boosts user experience of the business apps & helps you maximize the benefits of Office 365 Enterprise license investments by making the most of Canvas Apps and Power Automate, along with Viva to enhance employee experience as well.
