

Java 1.8 or lower to Java 17 or greater

Accelerate Your Java Modernization

Worried about outdated Java Tech stack?

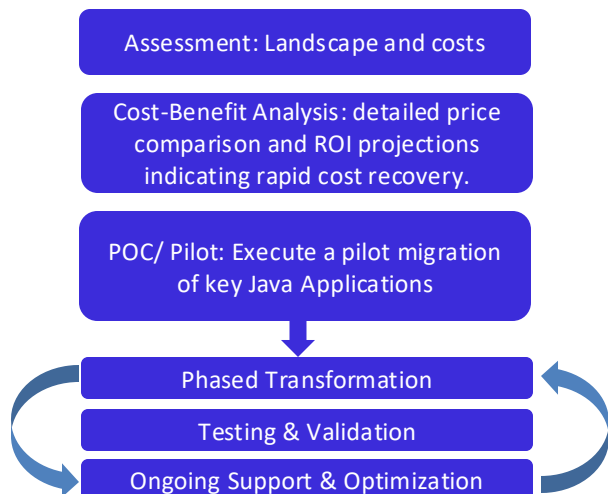

Legacy Java applications can limit innovation, increase maintenance costs, and lack cloud compatibility. Upgrading to modern Java 17 or higher unlocks cloud-native capabilities, cross-platform flexibility, and improved performance.

Hexaware's Java upgrade simplifies Java modernization with automation-driven migration, ensuring seamless upgrades, reduced costs, and faster time-to-market promising enhanced performance, and measurable business outcomes

Why Move from Java 1.8 or lower to Java 17 or greater?

Eliminate	• high operational costs	• Legacy Architecture	• Obsolete ecosystem	• Performance constraints
Boost	• Scalability & flexibility	• Security & Compliance	• Tech Debt Elimination	• AI/ML integration

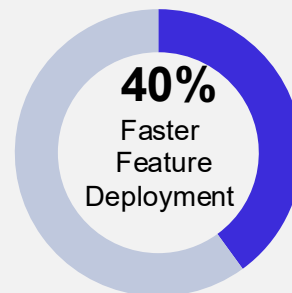

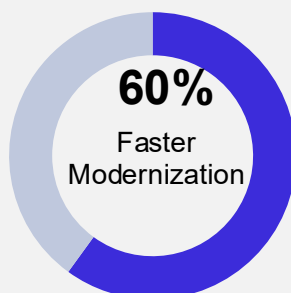

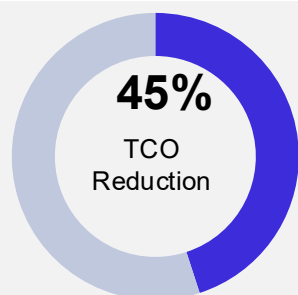

Move fast with Hexaware to ace your transformation

Next Steps? – Join our Pilot Program

- Conduct automated assessment and deliver detailed report in a week
- Execute Pilot for 2 select applications within 2-3 weeks
- Review Pilot outcomes and finalize full migration roadmap within a week

Assessment + 2 apps migration
\$50,000 USD

To kick start your Java modernization journey, please contact your Hexaware representative.
