

Boomi to Azure Integration Services (AIS)

Consolidate. Modernize. Optimize

Rising Boomi Subscription costs and Integration Complexity?

Boomi is a cloud-based iPaaS platform - but as enterprises align to Azure-first strategies, maintaining a third-party integration subscription increases cost, governance complexity, and operational overhead.

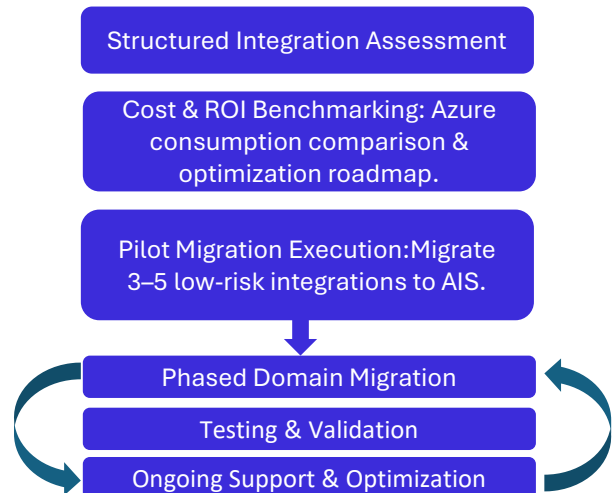

As integration volumes grow, so do licensing, runtime, and support costs - often without proportional business value.

Hexaware enables a structured transition from Boomi to Azure Integration Services - establishing Azure as the enterprise integration backbone while **reducing cost and improving scalability**.

Why Standardize on Azure Integration Services

Eliminate	- High Boomi subscription & runtime costs - vendor lock-in - Integration sprawl across platforms - Manual monitoring & reprocessing effort
Boost	- Azure-native integration architecture - API-led & event-driven connectivity - Unified governance & security (Azure AD) - Serverless scalability & automation

Move fast with Hexaware to ace your transformation

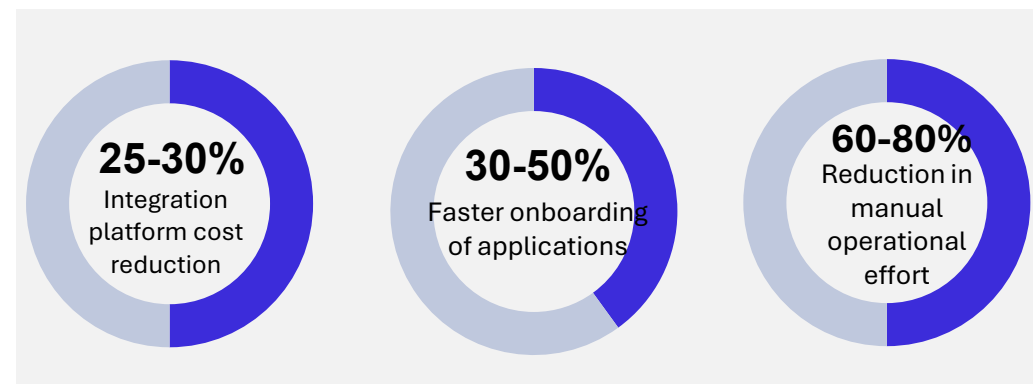

Next Steps? – Join our Pilot Program

- Conduct initial structured integration assessment and deliver detailed report in the same week
- Execute Pilot for x workloads within 2-3 weeks
- Deliver phased migration & exit roadmap
- Establish Azure integration governance model

Assessment + 3-5 integrations migration
\$50,000 USD

Business Benefits

To accelerate your Boomi exit and establish Azure as your enterprise integrate backbone, please contact your Hexaware representative.
