HEDIS® Quality Reporting

Hexplora Highlights

HEXPLORA, a HEDIS® certified vendor, offers a Quality Management solution that provides comprehensive Reporting and Analytics at:

- Population
- Provider
- Member level.

HEXPLORA's solution allows a Health Plan to track performance measurement of Quality Measures across - Commercial, Medicare, and Medicaid lines of business including HEDIS, STARS, and state-specific Medicaid measures.

HEXPLORA provides robust solution to help overcome challenges associated with HEDIS Reporting. Hexplora helps payers analyze and address STARS and HEDIS measures with robust predictive analytics and a scalable processing system.

HEXPLORA seamlessly integrates data; categorizes dashboards and reports based on health plans, overall measure and product lines and establishes a benchmark across – providers, practices, organizations, etc...

HEXPLORA being a HEDIS certified vendor, Health plans can rely on the accuracy of quality measure rates and care gaps identified by our solution. Health plans can collaboratively and seamlessly engage Providers in achieving compliance with the quality measures.

HEXPLORA portal offers the capability for Providers to track and monitor quality measures and care gaps for their assigned patients directly from the portal or through subscription reports that are automatically emailed to them at provider selected frequencies.

HEXPLORA's Role-based security ensures that Providers can view and access only their assigned patients.

HEXPLORA provides the ability for health plans to also view compliance rates based on a rolling prior 12-month timeframe. Because Quality measure rates calculated in the first half of the year, based on year-to-date partial data, are not fully indicative of the underlying quality compliance.

Year	TIN/Provider	NPI/Provider	STAR Category	HEDIS Category	Domain	Subdomain
2017	All	All	All	All	All	All

Sub Measure Name and Id	Rate	Status	Target	FPMM	Member Months	Members	Denominator	Numerator
Statins Therapy for Male Patients With Cardiovascular Disease - Received Statin Therapy (SPC-Male)	87.82 %	🟢	90.00 %	\$4,431	123	11	11	9

Hexplora Functionality

Hexplora's quality reporting maximizes the output in following ways:

- ✓ *Proactive and continuous monitoring of Quality Measures including HEDIS and Medicare STARS*
- ✓ *Identification and tracking of Quality Gaps across time*
- ✓ *Comprehensive Analytics for tracking of cost and utilization trends by measure*
- ✓ *HEDIS measure tracking, Reporting, and Submission*

Proactive and continuous monitoring of Quality Measures including HEDIS and Medicare STARS

Our quality reporting empowers health plans and care providers to seamlessly monitor the HEDIS score to make proactive interventions to meet the regulatory requirement without fail with the power of data-driven quality analytics. Measure end-to-end care effectiveness at provider-level across all the healthcare organizations located at different sites in a centralized platform. All the provider network can generate insights to be in the know of care gaps to create more engaging programs while meeting the HEDIS star rating.

Measure Name	Description	Numerator/Denominator	Age Group	Date	Status
Adult Blood Pressure (BP)	...	752 / 1000	18-64	12/31/2019	85%
Adult Cholesterol (LDL)	...	458 / 1000	18-64	12/31/2019	46%
Adult Diabetes (HbA1c)	...	200 / 1000	18-64	12/31/2019	20%
...

Identification and tracking of Quality Gaps across time

Healthcare organizations aspire to offer high-quality care to every patient but continue to fail in meeting quality compliance measures perhaps because of inadequate quality tools providing a 360-degree view of patient' care. Hexplora consolidates clinical and claims records in one location – in all likelihood – clearing up the ambiguity and motivating care management team to pinpoint reasons for lacking in HEDIS quality measures.

Measure ID	Title	Status	Target	Performance
CEC	1888%	84%	84%	84%
...

Comprehensive Analytics for tracking of cost and utilization trends by measure

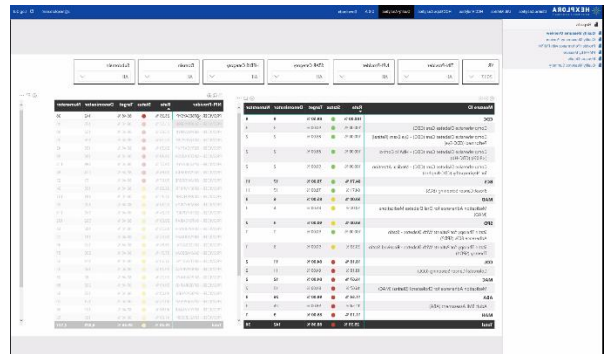

In-depth analytics enable healthcare authorities to discover underlying trends and possible interventions which were overlooked in unstructured patients records in a few clicks. Our reporting solution motivates coordinated teams to create impactful Managed Long-term

Care (MLTC) programs for chronically ill patients. Our customizable solution aims to improve patient engagement that improves patient compliance which in turn exponentially increase financial outcome.

HEDIS measure tracking, Reporting, and Submission

Health plans can continuously measure the performance of healthcare providers across all the five domains of HEDIS and critical dimensions of care. Moreover, our reporting solution allows health plans to compare performance on “apple-to-apple” basis. With comprehensive reporting, get full transparency into numerators, denominators and exclusions bridging the gap between patients and providers. Hexplora ensures provider data submission complies with annual updates in measurement sets and enables to make state-specific submissions.
