

Heyhack

Heyhack Scan

Automated Penetration Tests for SOC 2 and ISO 27001

Run automated penetration tests of your web applications and APIs and comply with SOC 2 and/or ISO 27001.

Easily publish penetration test reports and results to your compliance automation suite via Heyhack's APIs.

The screenshot displays the Heyhack interface with a sidebar on the left and a main content area. The main area is divided into two sections: 'COVERAGE' and 'FINDINGS'.

COVERAGE

Test Cases: A test case is a test for a specific vulnerability.

OWASP TOP 10:2021 CATEGORY	SUCCEEDED	FAILED
A01:2021 - Broken Access Control	1,784	208
A02:2021 - Cryptographic Failures	329	2
A03:2021 - Injection	88	1
A04:2021 - Insecure Design	184	0
A05:2021 - Security Misconfiguration	80	104
A06:2021 - Vulnerable and Outdated Components	514	138
A07:2021 - Identification and Authentication Failures	66	0
A08:2021 - Software and Data Integrity Failures	989	0
A09:2021 - Security Logging and Monitoring Failures	31	0
A10:2021 - Server-Side Request Forgery (SSRF)	1,002	0

FINDINGS

FOUND	VULNERABILITY	NAME	CVSS 3.0	ACCEPTED	REJECTED	RESOLVED
Oct 25, 04:39:04	SQL Injection	/api/search?q=	High 10.0	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Oct 25, 04:06:49	Broken Access Control	/api/BasketItems/	High 9.8	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Oct 25, 04:07:19	Cross-site Scripting (Reflected)	/search?q=	High 9.1	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Zero Configuration Required

Set up a web application to test in Heyhack with just a couple of clicks. Simply provide the URL address of your web app along with the credentials of one or more test users. Start testing in less than 5 minutes.

Integrate Your Compliance Suite

Seamlessly connect Heyhack with your compliance automation suite. You can either publish automatically generated pentest reports as PDFs or synchronize web-related issues found by Heyhack.

Supports Multiple Test Users

As the only pentest solution in the market, Heyhack supports testing applications with multiple test users. This lets Heyhack test for vulnerabilities related to Broken Access Control—the #1 issue in OWASP's Top 10.

100% Transparency

Heyhack documents every single step of the penetration test with both screenshots and test cases. This lets you examine all pages and page elements that have been crawled and tested by Heyhack.

Comprehensive Coverage

Heyhack comprehensively covers all parts of your application. By simulating real web browser instances in the cloud, Heyhack interacts with your web app like a real user would, letting us uncover all functionalities.

Documentation for SOC 2 & ISO 27001

Generate PDF reports that summarize the results of penetration tests conducted by Heyhack. Tailor the contents of your PDF reports to your recipients—either auditors or customers who require documentation.
