Life is an Adventure Your Database Shouldn't Be

About RavenDB

RavenDB is a leading Document Database designed to eliminate the common challenges of developing business applications. Built from a desire to improve on existing databases, it empowers businesses with a smart, fast, and reliable data solution that handles complex data issues, allowing teams to focus on innovation. Trusted by thousands, RavenDB powers IoT, big data, microservices architectures, and modern distributed data networks, delivering the performance and scalability needed for today's application demands.

What we offer

RavenDB combines speed and consistency, ensuring that businesses can operate at scale without sacrificing data integrity. Its built-in support for distributed architectures provides seamless replication and data distribution, allowing companies to maintain data consistency across multiple locations. RavenDB's efficient performance, intuitive user interface, and automatic data indexing set it apart as a user-friendly, developer-focused solution designed to minimize friction and enhance productivity. RavenDB integrates smoothly with Microsoft Azure, leveraging Azure's scalability, security, and global network infrastructure to provide an optimized deployment experience in the cloud. By running on Azure, RavenDB can take advantage of Azure's compute, storage, and networking services, offering users the flexibility to deploy in virtual machines, Kubernetes, or Azure App Services.

What our customers are saying

“

RavenDB does everything I need, and a million times more

”

Jeremy Holt

CEO, Amberwood Trading

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud. Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers. We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups. With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
