# Covering absences with zero stress for managers?

In short: yes.

**This is very common, especially during activity peaks.**

Our platform:

- Finds a short list of appropriate replacements

- Starts notifying suitable employees on their mobiles – to find a replacement

- In case the proposal is refused, it automatically finds a new replacement - and so on until the need is covered

- Understands the organization to propose only suitable replacements

# The benefits

**0**
wasted working hours

**0**
scheduling & payroll errors
