

AKITA

## Revolutionizing IoT Security with the power of the community

---

*Smart Home IoT Security As-A-Service*

***Value proposition for Antivirus companies***

We want to protect every Smart Home as close as possible to **PCI Security** standards.

**Solution**

**Akita.Cloud** platform provides Home Network Vulnerability-Scan-As-Service ( **Patent** backed ). The scan uses enterprise-grade penetration techniques, Akita Home Network Threat Intelligence, Akita Network Behavior Analysis AI Models , and Third-Party Threat Intelligence Sources to provide the scan result for less than 2 minutes.

The screenshot shows the Akita website's 'My IP Scan' service page. At the top left is the Akita logo. The navigation menu includes 'Buy Akita', 'News', 'FAQ', 'About Us', and 'Contact us'. The main heading is 'My IP Scan' with a target icon. Below it is a quote: 'Did you know that: "Most ISP routers used by home customers are profoundly not secure, and some routers are so vulnerable to attack that they should be thrown out ..." [Source]'. The main content area has the text: 'Check if your gateway is secured. Receive scan results to your email.' Below this is a form with an input field 'Enter your email address' and a 'Check it now' button. A checkbox is checked with the text 'I would like to receive a price proposal for cybersecurity insurance.' At the bottom, there is a 'Disclaimer' section with the text: 'This IP scanner has been made available to you for your own legitimate internal purposes in scanning your own'.

- Akita Home Network Vulnerability-Scan-As-Service ( Patent backed ) could be initiated from Antivirus Desktop client
- Network Vulnerability scan together with installed Antivirus , is part of Akita wholistic vision of Home Network protection. More could be learned [here](#).
