

**Power Platform SMB Business Value Assessment Offer**

# Hikari – Your Power Platform Partner

Power Apps

Power Pages

Power BI

Power Virtual Agents

Power Automate

# Hikari SMB Design

Hikari's own tailored **Business Value Assessment**, built for SMBs

## Hikari Design

### First Steps:

Schedule 2h x10 Key Stakeholder meetings to collect grassroots feedback on process challenges and opportunities.

### Expectations:

Over 2h our consultant will gather structured feedback on current state processes and workflows, noting challenges and opportunities identified. 10 Stakeholders will be interviewed.

### Benefits:

Fully interactive **Business Value Assessment** (Power BI):

- presents all feedback in a simple view.
- presents value by risk, cost, revenue impacts
- presents word clouds and key findings per process.
- gives AI-generated sentiment analysis per process.
- suggests project charters, scopes and timelines.
- maps potential time return per role, process and function.
- prioritises solution areas, elevating "quick wins".
- suggests a Power Platform roadmap in Gantt.

### Next Steps:

**Hikari Achieve**

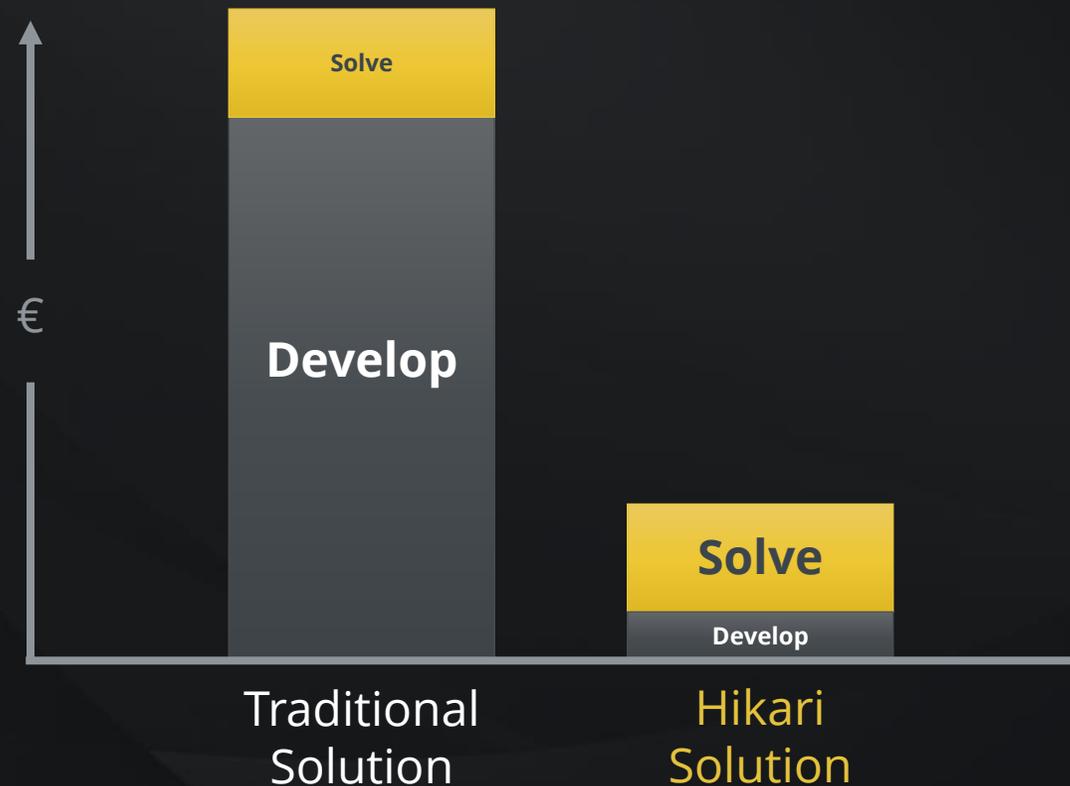

# Other Hikari Pre-Sales Packages

Here is a selection of **Presales Offers** ready to go.
