

Migrate Dynamics On-Premise To Cloud

2 - Week Assessment

CONTACT US today to get started!

Overview

ERP and CRM modernization is no longer optional. Business model innovation is critical to competitive differentiation across all industries.

Take the first step in modernizing your on-premises solution by gaining a thorough understanding of what moving to Dynamics 365 could mean for your organization, employees, and customers.

With extensive solution development experience, Hitachi Solutions can help you improve your workforce productivity by leveraging Microsoft Dynamics 365 and the Microsoft Power Platform. We will work with you to understand your environment and identify where the opportunities are to achieve continuous business value from your Microsoft investments.

Why Take Action?

Does your organization have a clear path on how to migrate to the cloud? Or are you struggling with:

- Understanding your current on-premises business processes?
- How your existing processes map to the capabilities in Dynamics 365?
- What to do if you identify a gap in the mapping?
- How your team can best consume new capabilities and enhancements available in Dynamics 365?

If you said “yes” to any of the above, the 2-Week Assessment will support your company to **properly chart both the functional and technical steps necessary to successfully migrate your business applications to Dynamics 365.**

Hitachi Solutions will guide and educate you on how the integrated Microsoft security platform can help provide integrated protection for hybrid and multi-cloud resources. We'll discuss the technologies needed to secure, manage and control access to multi-cloud resources and provide advanced threat detection and defense.

Outcomes

With our 2-Week Assessment, your organization will drive deep understanding of the benefit and impact that cloud migration could have on your organization. Start your journey to the cloud with a baseline technical and functional review of your current on-premises solution, along with specific recommendations and considerations. Here's what you can expect:

Deliverables

- The final report documents, insights, analysis, and recommendations for moving to Dynamics 365 cloud.
 - Business objectives overview
 - ISV overview with recommendations
 - Technical dependencies and recommendations
 - Recommendations on ideal upgrade approach
 - Migration next steps

Objectives

- Understanding the benefits of moving from an older, on-premises solution to the cloud
- Identify business objectives and tie those into the functionality of Dynamics 365 cloud
- Learn how to optimize the migration process with a focus on reducing effort and costs

With this assessment, successfully secure your multi-cloud environments.
