

Accelerate AI Adoption

2 - Week Assessment

CONTACT US today to get started!

Assessment Overview

There has been a rapid increase in the number of AI centered capabilities across Microsoft's applications and technologies – from Copilot to OpenAI the need to understand how these solutions fit into the broader Microsoft ecosystem is imperative to the long-term success of any organization.

Our **2-week engagement** is intended to provide guidance on the new capabilities across the suite of Microsoft AI enabled applications and tools and to evaluate your organizational readiness to adopt and embed these tools into your applications and/or workflows. With **clear understanding of business impact, ROI, and cost benefit insights**, along with guidance on how to structure your organization's **AI adoption strategy, backed by governance planning**, your team will be able to see through the headlines to what matters for your enterprise.

Hitachi Solutions has a team of advisors that work with you **build confidence** in your ability **to safely adopt AI** tools focused on tangible business outcomes.

Why Take Action?

- Is your IT department and leadership prepared to navigate and leverage emerging technologies like AI?
- Do you have a planned approach to securely harness and leverage the business opportunities AI technologies offer?
- Have you instituted a **Responsible AI** internal and external organizational approach to widely available tools like ChatGPT?

Outcomes

- Confirmed organizational understanding of current and emerging AI capabilities and opportunities across the Microsoft stack for both internal and external customers and constituents.
- Guide to prioritization and preparation to incorporate AI into solutions responsibly and effectively.
- Map to communicate and govern AI usage internally.
- Key Performance Indicators (KPIs) for Responsible AI integration.
