Assessment Overview

Hitachi Solutions is driving innovation, scalability, and performance with our **Azure Application Modernization Assessment**.

Addressing business concerns no matter where the pin drops on the map of modernization, Hitachi Solutions will work side by side with you to deliver an **application portfolio rationalization** against your **business objectives and available migration strategies**.

Our **Azure Application Modernization Assessment** first provides an **in-depth analysis of up to 5 selected applications**. The end result? We arm you with a **customized, deployable, architecture design and migration plan** to modernize those applications to a **production ready PAAS solution in Azure**. And your organization will be well-equipped to execute a clear-cut modernization strategy.

Why Take Action?

Struggling with **performance**? Concerned about **security**? Need to **reduce costs**?

Our **Azure Application Modernization Assessment** addresses your **challenges** with:

- Obsolete systems and database incompatibilities impeding application performance and innovation
- The rising costs of cloud services and application maintenance.
- The difficulties associated with scaling swiftly to capitalize on new business opportunities
- Security concerns related to applications, data, and an unclear cloud governance plan

Partner with us to **maximize ROI, user readiness** and **adoption** through **change management**.

Outcomes

We follow a defined, tried and tested path for optimal modernization paths for custom applications of all sizes and complexity levels.

Focusing on **governance** from the very beginning, our **highly-experienced team** of experts will help you create a clear, actionable plan **to successfully modernize and/or migrate your workloads to the Azure cloud**.

With our assessment you will receive:

- **Modernization Plan**
- **Cloud Governance Plan**

Hitachi Solutions also offers services with expanded coverage of up to 40 apps, assessment of your architecture within the Well Architected Framework, and advanced evaluations of your microservice, mobile and data estate future state and readiness.
