Microsoft Copilot for Microsoft 365

2-Week Proof of Concept

CONTACT US today to get started!

PoC Overview

Jumpstart your company's generative AI journey with a **targeted pilot to demonstrate how Microsoft Copilot for Microsoft 365** can streamline your business while increasing employee productivity and satisfaction.

Copilot is transforming work - revolutionizing the way businesses operate and multiplying employee productivity. With our advisory-led proof of concept, **Hitachi Solutions will help identify areas** of the business that can **benefit most** from this new technology and enable a pilot group of users to show how employees using M365 Copilot will directly drive benefits to your bottom line.

Why Take Action?

Struggling with size of workforce constraints? Have a high volume of information? Want to maximize your meeting outcomes?

Our **Microsoft Copilot for M365 PoC** will help you save time and **make real productivity gains.** Here are a few examples:

- **User Experience and Productivity:** By eliminating repetitive simple tasks, employees will have increased job satisfaction and higher productivity.

- **Increased Velocity:** Copilot can reduce the time to analyze data, summarize documents, even proofread emails and suggest changes to improve tone and sentiment.

- **Knowledge Aggregation:** Copilot's search capabilities help employees sift through their digital life to find answers that they have access to without the hassle or inaccuracy of traditional search techniques.

Partner with us to **maximize ROI, user readiness** and **adoption** through **change management.**

Outcomes

Our team will deliver an advisory-driven POC to help you identify business priorities to be addressed with Microsoft Copilot for M365. Our team will guide you through a 3-phased engagement resulting in the below deliverables:

1. Executive Advisory | 2. Copilot Implementation | 3. Review & Expansion

- Recommended Microsoft Copilot for Microsoft 365 use cases and supportive organizational changes to achieve desired outcomes.

- Risk analysis – comparative to future readiness assessment, people strategy to support implementation.

- Microsoft Copilot for Microsoft 365 Pilot for up to 25 users

- Professional Services Proposal for remaining Production Rollout, inclusive of Managed Services providing ongoing technical support.

During the PoC, should areas be identified where you may be under-utilizing features of Microsoft 365, our Hitachi Solutions team can help!
