

# Offer: Governance and Security Strategy Workshop

## Overview

Microsoft Power Platform is a low-code/no-code tool for automating processes and building business applications that support digital transformation and your new modern workplace. It empowers employees to create and customize data-driven and task-specific apps in-house. While Power Apps provides opportunity for helping meet your changing business needs, without proper guidance you could be putting your company's security at risk.

This Governance and Security Strategy Workshop provides in-depth activities designed to help you plan and set goals for maintaining corporate best practices, security, and governance while leveraging Power Platform for your digital transformation.

## Why Act

- Security, governance, and administration knowledge transfer
- Ensure the right tools and connections are being used to support your strategy
- Understand how to manage the platform and data access
- Evaluate the Center of Excellence (COE) and other tools for more effective Power Platform management
- Empower makers to adopt the platform and be more successful

## Approach

- Administrator Training
  - Environment creation, access, and control
  - Management of capacity and API limits
  - Data loss prevention (DLP), security roles, and AD security groups
- Environment Strategy
  - ALM strategy, DLP environment
- Readiness Assessment
  - Evaluation of current app and flow assets, environment strategy and maturity, recommended improvements
- Platform Ownership
  - Pillars of successful citizen developers, building adoption, COE charter/role development
- COE Starter Kit
  - Toolkit deployment, evaluation, enhancement

## Outcomes

- Deployment of the COE starter kit
- Governance and administration training
- Workshops defining strategy for governance, environment management, data loss prevention (DLP policies), and maker enablement
- Documentation of findings and recommendations
- Enhancement of COE starter kit
- Assessment of current apps and flows
- Maturity assessment (maker and environment maturity)
- Licensing review
- Development of RACI responsibility matrix for Power Platform administration

# How Hitachi Can Help: Where do you want to go?

Conduct in depth workshops to fully understand current state and desired future state, bring industry best practice knowledge.
