

Migrate & Secure Windows & SQL Server

2 - Week Assessment

CONTACT US today to get started!

Assessment Overview

Hitachi Solutions is helping customers migrate to the cloud – driving savings on cloud costs, increasing efficiency, and accelerating growth through adoption of a cloud operations-based model leveraging Microsoft Azure. The result? Transformation of your business with agility, resiliency, and cost optimization.

Our **2-week engagement** will help you determine what can, and should, be moved to the cloud. With **clear understanding of business impact, ROI, and cost benefit insights**, along with guidance on how to structure your organization's **migration strategy, backed by governance planning**, your team will be able to finalize your migration prioritization and planning strategy.

The Hitachi Solutions team members who will support you are the evolution of traditional enterprise architects; have lived through eras of computing: mainframe, the proliferation of personal computing, virtualization, Cloud computing, and are well-equipped to support your Cloud adoption journey.

Why Take Action?

Struggling with **scalability**? Concerned about **risk**? Need to **reduce costs**?

Is your current environment challenged by:

- Aging Windows and SQL infrastructure
- Rising maintenance costs
- Outdated versions of Windows and SQL
- Difficulty scaling fast enough to meet new business opportunities
- To secure Windows OS, Windows Server, and SQL Server
- SQL End-of-Life
- Slow deployments
- Slow pace of innovation
- Go-to-market velocity for new products or applications

Outcomes

With this assessment, we'll support you in gaining **the insights, analysis, and recommendations you need** to successfully plan your move to Azure:

- Executive summary outlining your cloud readiness ratification and prioritization of workloads to move to Azure
- In parallel to migration, a plan to roll out Azure Arc across the remainder of the estate to enable single-pane visibility and modern, Azure-based management
- 3-5 year TCO analysis
- Cost benefit for different migration options including AHUB/RI benefit for VMs and SQLs
- SQL Servers recommendation to use Azure SQL MI with PaaS benefits
- High-level Migration Plan
- Azure foundations security recommendation identifying areas of opportunity for Azure Security, Sentinel and Azure Defender for all cloud workloads
