

Opening the Door to OpenAI

3 - Week Assessment

CONTACT US today to get started!

Assessment Overview

Understanding and implementing OpenAI is a complicated process with a myriad of ethical and governance related concerns. That's where Hitachi Solutions' **3-week engagement** comes in. Our team of experienced scientists and engineers will guide you on **what processes within your organization could benefit from OpenAI, identify potential risks, and help you set up necessary governance structures.**

But we don't stop at advice. We deliver tangible results, including a **secure ChatGPT summarizer, onboarding documentation, and a backlog of specific use cases** for your organization. We also ensure these resources are implemented effectively in a production-like environment.

Additionally, we train your staff to use these new tools and provide insights into OpenAI's cost models. At Hitachi Solutions, our goal is to equip your organization with the tools and knowledge to optimize OpenAI's capabilities, now and in the future.

Why Take Action?

Is your organization ready to **leverage the potential of OpenAI** but unsure how to begin? Do you have questions about managing and controlling the use of OpenAI tools effectively and safely?

Is your organization is facing:

- Uncertainty about how to integrate OpenAI services into existing workflows
- Confusion about how to manage the risks and governance related to AI
- A gap in knowledge about which business processes should be driven by AI
- Struggles with a high volume of customer inquiries or data overload
- An urgency to maintain a competitive edge in the era of AI and machine learning

Our '*Opening the Door to OpenAI*' assessment is designed to navigate these complexities. With our structured engagement, Hitachi Solutions will guide your organization in identifying and implementing OpenAI capabilities, driving improvements in productivity and efficiency.

Outcomes

Through this engagement, we'll provide the guidance, insights, and support to unlock the potential of OpenAI in your organization:

- **Secure AI Implementation:** We'll deliver a secure ChatGPT summarizer, including machine learning and transformation pipelines, tailored to your organization's needs.
- **Operational Readiness:** Onboarding documentation to ensure smooth integration and understanding of new tools and operations.
- **Custom Use Case Backlog:** A backlog of potential ChatGPT use cases will be provided, specific to your organization's unique requirements.
- **Real-world Deployment:** Resources will be deployed to a production-like environment to ensure readiness and operational efficacy.
- **Staff Training & Knowledge Transfer:** Your internal staff will receive training on the new tools, fostering a culture of continuous learning and self-improvement.
- **Governance & Security Framework:** We'll establish a clear framework for governance and security structures, ensuring a safe and structured use of OpenAI tools.
- **Cost Model Understanding:** Understanding of cost models for OpenAI in relation to your specific use cases will be provided, ensuring cost-effectiveness and ROI.
