

Return to the Workplace Solutions

Returning to the workplace during a pandemic. It's a situation few of us thought we'd face. Ensuring our customers have the very best solutions as their disposal is of critical importance for us.

Our teams have been working alongside Microsoft throughout the summer to deliver rapid value, low code solutions built on the Power Platform that help organisations and employees return to the workplace safely and with confidence.

Our Return to the Workplace Solutions Enable:

The management of the workplace

The safe return of staff to the workplace

Robust measures to protect staff

Reporting of progress and current state for management

Auditing of which employees access which facilities and when (support test and trace)

Desk Booking

Identify the number of employees in the office and give employees the option to book desks.

Room and Zone Booking

Enable employees to book rooms and manage capacities within office zones (e.g. floors), ensuring compliance.

Building Access Management

Track which employees are accessing your buildings, set periods for arrival, and help enable test and trace in event of COVID cases.

Location Readiness

Quickly determine the readiness of different locations and efficiently manage their safe reopening using critical data like COVID infection rates and supplies availability.

Workplace Care Management

Actively manage COVID-19 cases, identify hot spots for safety improvement, and import data from other systems to aid in case management. Dashboards enable monitoring of all solution data.

Facilities Management

Help your locations remain open safely with tools for monitoring occupancy, health supplies, safety procedures, and other facility-related best practices.

Employee Health and Safety Management

Keep employees safe and productive with self-service tools that allow them to check into work remotely and self-screen before entering facilities.
