

Hitachi Solutions Data Analytics: Starter for 10

Find answers to your company's
most important questions

Have you seen a
Microsoft Power BI demo
and wondered how your
business could benefit?

The opportunity to simplify data,
drive analysis and produce beautiful
reports is appealing, but is it difficult
to know exactly how it would work
in practice?

**Hitachi Solutions
has the answer.**

Try a pre-packaged, time-boxed
delivery of Microsoft Power BI
using your existing data.

Try for yourself how your business questions can be answered with the Starter for 10 package. Using all the features of Microsoft Power BI, we use your existing data to drive real results for your business. Data is the same as any other asset, it has to work for you - propelling your business forward and delivering tangible results - to be of any use.

If you currently hold data that could be working harder and understand the value of dashboards delivering a 360-degree view of your business whilst bringing your data to life, this package could be exactly what you are looking for.

Connect to what matters to you

Wherever you are in your analytics journey, Hitachi Solutions can help by utilising Microsoft Power BI in a flexible, scalable way. Our Starter for 10 package allows you to try a fully tailored solution, unique to your business. You can experience for yourself the advantages of harnessing the true value of your data in ways you can easily share across your company.

The Starter for 10 Package

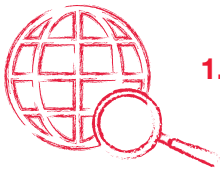

The Starter for 10 package gives your business ten full days of support and the chance to try out all the features of Microsoft Power BI, using your data, to see exactly how it will benefit your company.

We will help your business ask the right questions and work toward delivering a tangible output that answers the 'So What' challenge when it comes to your data.

The Starter for 10 package is available at a cost of £10,000.

Four Key Areas

Our solutions help you move quickly from insight to action.

1. Data Sourcing and Gathering

At Hitachi Solutions, we are experts in sourcing and gathering your data. We take a full inventory of what data you currently hold and where it resides. Languishing data is no use to anyone – we pull out what is relevant, disregard what isn't, and provide a model for Microsoft Power BI to analyse.

3. Dashboard Building and Socialising

Microsoft Power BI dashboards bring data alive and make it easy to share insights with the people who matter. Our solutions will empower your business to make better decisions, reduce costs and improve services, as lightbulbs go on throughout your organisation.

2. Data Wrangling and Model Building

Pulling data together from potentially hundreds of sources is what Microsoft Power BI does best. This data becomes more than just the sum of its parts as new information illuminates insights and provides a completely new data story.

Many businesses find this information alone covers the return on investment.

4. Optional Extras

We offer a number of optional extras you can add on to your package as and when you want. Our agile and responsive approach puts you in the driving seat and includes:

- A single real-time feed with one extra dashboard.
- Social Media data (Facebook and Twitter) with dashboard.
- A quarterly three-day refresher to ensure the latest improvements are being implemented.
- Data Enrichment.
- Hosting.

Our approach

At Hitachi Solutions we focus on solid outcomes. Our business is about opening up more opportunity for your business, using the very best digital technology available in the market today. Our long partnership with Microsoft means we are always at the forefront of delivering the latest technological advances.

We are also experts in analysing data and extracting nuggets of information which contain real value for our clients. We are confident we can do the same for you.

Our Starter for 10 package, gives you the ability to try out the very best in cloud-based technology with the minimum of outlay and commitment and the maximum amount of flexibility and return.
